Installing Software

iriver plus 3 and Windows Media Player 11 are integrated programs that efficiently manage music and picture files. Using iriver plus 3 and Windows Media Player 11, you can save music and picture files from PC to the iriver B20.

| Installing iriver plus 3 | ·····································

1. Insert the installation CD to your PC to display the installation process screen.

2. Select iriver plus 3 and click the [Install] button. Complete the installation process following the on-screen instructions.

Note

- Minimum requirements for using iriver plus 3
  - Intel® Pentium®ll 233MHz or higher processor speed
  - Windows 2000/XP
  - 64MB or above memory
  - 30MB or above hard disk space
  - 16bit enabled speaker and sound card
  - Microsoft Internet Explorer version 6.0 or later
  - SVGA or high resolution monitor (1024x768 resolution or higher)
- For more information on using iriver plus 3, refer to page 40 - 42.

| Installing Windows Media Player 11 | ····················

1. Insert the installation CD to your PC to display the installation process screen.

2. Select Windows Media Player 11 and click the [Install] button. Complete the installation process following the on-screen instructions.

Note

- Minimum requirements for using Windows Media Player 11
  - Intel® Pentium®ll 233MHz or higher processor speed
  - Windows XP
  - 64MB or above memory
  - 30MB or above hard disk space
  - 16bit enabled speaker and sound card
  - Microsoft Internet Explorer version 6.0 or later
  - SVGA or high resolution monitor (1024x768 resolution or higher)
- For more information on using Windows Media Player 11, refer to page 43 -45.

Turning on/off the Player

1. Press the [⏻] button on the product to turn it on.

2. Press and hold the [⏻] button on the product to turn it off.

10

Note

- This product has an automatic power saving function to save battery power. Based on the setting in power saving mode, the product will be automatically turned off after designated period without operation. For more information on setting this mode, refer to [Settings > Timer > Auto Power off]. (Refer to page 37.)

- Based on this setting, the way to turn on the product and battery consumption rate will be changed. For more information on setting this mode, refer to [Settings > Advanced > Power Off Type]. (Refer to page 38 .)

  • Sleep
  - When turn on the product, the last used function will be displayed.
  - The battery will be consumed slightly in this mode.

  • Power Off
  - When turn on the product, the main screen will be displayed. The start-up time will be slightly taken to read all stored files.
  - The battery will not be consumed when powered off.

iriver D-Click System™

B20

1. The B20 has an unique operating system named iriver D-Click System™.
To operate the product, press down on the edge of the screen in one of four directions.

Up: Moves to the previous sub-menu.

Left: Moves to the
previous menu.

Right: Enters to the
selected menu.
Plays the selected
sub-menu.

Down: Moves to the next sub-menu.
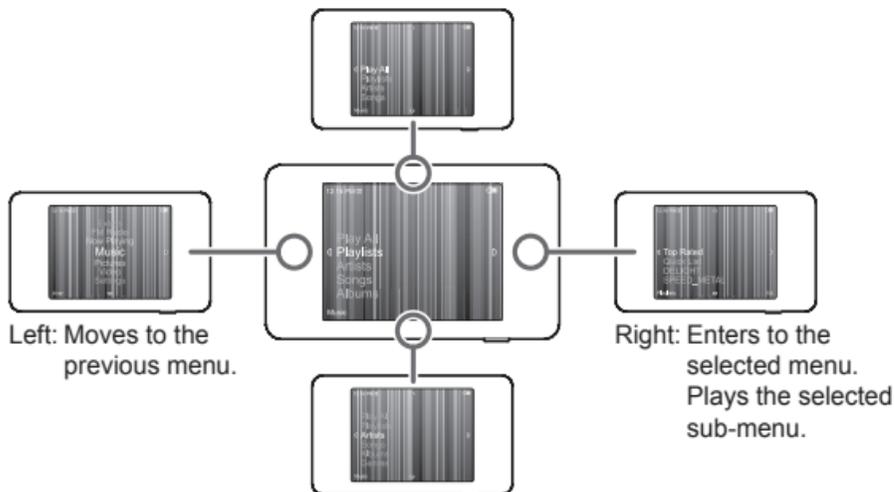

- Four arrows will be changed into different shapes based on the functions in each menu.
- Press and hold [LEFT] to return to the [Home] menu.
- In different menus, press and hold [RIGHT] to display the screen of current playing music.
- While playing file, press and hold [RIGHT] to display the additional features.

11

Using HOLD

1. Slide the HOLD switch to right to enable the HOLD function.

12
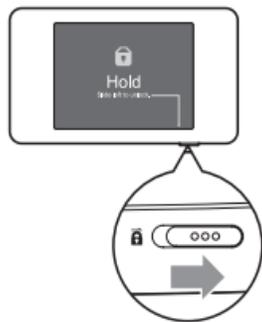

Note

■ Volume control is available while the HOLD function is turned on.

Connecting Products

B20

| Connecting Earphones to the B20 |

1. Connect the earphones to the jack of the product.

| Using Antenna |

1. To enhance signal reception performance of DMB/ DAB broadcasting, pull out the antenna to the full.

Note

- If signal reception performance is poor, pull out and reorient or relocate the receiving antenna.
- Be sure to check the direction when you fold the antenna. If you fold the antenna to improper direction with excessive power, it can be damaged.
- Do not bend the antenna with excessive power to avoid damage.
- Keep the antenna away from children to avoid eye injury by prick.
- Keep the antenna away from electric sources such as power outlet.

| Charging the Battery |

1. Turn on your PC and connect the B20 to it using the USB cable.

Note

13

- While the product is connected to PC using the USB cable, the integrated battery is will be charged automatically.
- Do not use any other USB cable that is not provided with the product. It may case a malfunction.
- Check if the B20 is connected to a high-power USB 2.0 port. Some low-power USB ports built in some peripheral devices such as certain keyboards and USB hub without integrated power may not provide enough power to charge.
- While the PC is switched to standby mode, the product may not be charged.
- Charge the product only in room temperature. The product may not be charged in extremely hot and cold place.
- The available usage time of charged battery becomes gradually short after sometime.
- It will be fully charged within 3 hours. (Based on fully discharged and stop mode)
- The charging time might be extended when you use the product while charging.

Connecting Products

B20

| Inserting/Removing Mini SD Card | ....

| Recommended Types of Mini SD Card | ....

1. Open the card slot cover after turning off the product.

2. Insert and slightly press a Mini SD card to the direction as shown below.

14
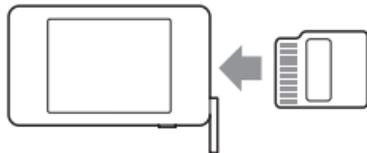

3. Press the card again to remove it.

Note

- Be sure to insert/remove a Mini SD card after turning off the product.
- Do not use excessive power to insert a Mini SD card. It can cause a malfunction of the product or a damage of Mini SD card.
- Do not remove a Mini SD card while it is being used. It can cause a deletion of data, malfunction of the product or a damage of Mini SD card.
- Do not insert or remove a Mini SD card repeatedly.
- If you insert a Mini SD card improperly, it can cause a malfunction of the product or the card cannot be removed.

Brand	SanDisk, LG

Note

- Device may not be working with all Mini SD cards. Please follow our recommendation. Check iriver homepage for updates.
- Transfer speed of Mini SD card is subject to change depending on PC.
- Always backup valuable data first since formatting Mini SD card will delete all data in the card.
- Do not turn off the product or remove a Mini SD card while it is being formatted. It can cause a malfunction of the product and a damage of Mini SD card.
- It is recommended to format a Mini SD card as a FAT32 system in case the size is less than 2GB.
- If a Mini SD card was formatted by the product, reset the product after disconnecting a USB cable and connect the cable again.
- Format the Mini SD card when it is not detected or causes a malfunction.
- Mini SD card is not enclosed with the product. Please purchase it separately.
- The B20 supports a Mini SD card up to 2GB.

Connecting Products

| Connecting the B20 to your PC |

1. Press the [⏻] button on the product to turn it on.

2. Turn on your PC and connect the B20 to it using the USB cable.

3. If it is properly connected, the LCD will be shown as below.

12:16 PM

Copying File/Folder (Using as a removable disk)

Copying file/folder to the product

1. After selecting the file/folder in your PC, drag & drop it to the drive which appears as the product.
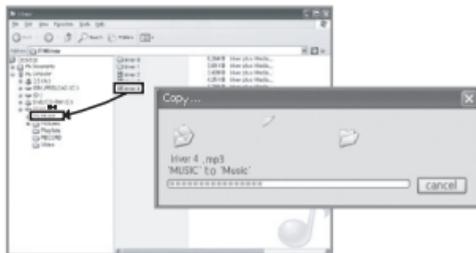

Deleting file/folder from the product

1. After selecting the file/folder, click it with the right mouse button and select [Delete].

2. Click [Yes] in the [Confirm File Delete/Confirm Folder Delete] popup window to delete the file/folder.

16
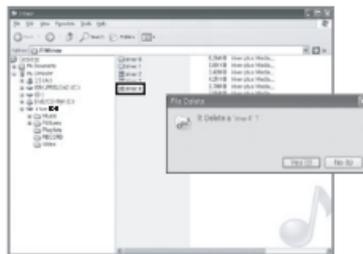

Note

- Always properly connect the USB cable.
- When you transfer data using the USB cable, never disconnect it or turn off the power to protect your data from damage.

Connecting Products

B20

| Disconnecting the B20 from your PC |

1. Click the icon on the taskbar to disconnect the product using the "Safely Remove Hardware" menu.
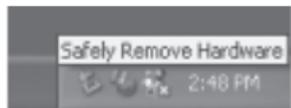

2. Click the [Stop] button to confirm disconnection.

17

Note

- The icon on the taskbar may be hidden in some operating systems. Click "Show hidden icons" to display the hidden icon.
- The "Safely Remove Hardware" may not be available while using some applications such as Windows Explorer or Windows Media Player.
- Close all applications first before performing the "Safely Remove Hardware".
  If the "Safely Remove Hardware" is not performed properly, try it after a few minutes.

Troubleshooting

B20

| Please check out! | ⋯⋯⋯⋯⋯⋯⋯⋯⋯⋯⋯⋯⋯⋯⋯⋯⋯⋯⋯⋯⋯⋯⋯⋯⋯⋯

● The player will not power on!
   - Check whether the battery is discharged.
     Charge the product using USB cable and check it again.
   - Insert a thin and pointed object (such as a straightened
     paper clip) into the reset hole to reset the device.

● The product cannot be charged after connecting power.
   - Check whether the USB cable is firmly connected.

● The battery power is consumed even though the product is turned off.
   - Check whether you are using certain functions such as alarm
     or FM Recording.
   - Check whether the setting in [Settings > Advanced > Power Off Type]
     is set to [Sleep]. The battery power is slightly consumed in [Sleep] mode.

● The signal reception performance for DMB/DAB is poor.
   - The channel scanning time might be longer if the signal is weak
     or not provided in that area. DMB/DAB service might not be
     available in a null point such as basement or inside a building.
   - DMB/DAB service might not be available in some districts.
     Be sure to check whether DMB/DAB service is covered in that
     area.

   - The quality of DMB/DAB service is subject to change depending
     on the conversion status provided by broadcasting service provider.

● The LCD display is turned off frequently.
   - To save power consumption, the LCD is designed to be turned
     off after designated time.
     Set up the duration in [Settings > Timer > Backlight].

● The product cannot be connected properly using the USB cable.
   - Check whether the USB cable is firmly connected.

49

● Poor radio or DMB/DAB service reception with heavy noise!
   - Check whether the earphones jack is dirty.
   - Check whether an earphone is connected.
   - Adjust the position of the player and earphones.
   - Turn off any nearby electronic equipment to avoid potential interference.

● No sound during playback!
   - Check whether the volume is set to "0".
   - Check whether the plug or connection jack of earphones is dirty.
   - Check whether the music file is corrupted.

Troubleshooting

B20

| Please check out! | ···

- The memory space is changed after formatting.
  - The memory space can be changed depending on the operating system.

- The start-up time is too long.
  - Check whether too many files are stored in the product. It is recommended to store 1,000 music files and 2000 picture files.

- Windows Media Player 11 cannot be installed.
  - Check whether you are currently using Windows® XP. Windows Media Player 11 only supports Windows® XP. If you are using other than Windows® XP, transfer files using iriver plus 3 or removable disk.

Federal Communications Commission (FCC)

B20

• Caution :

   Any changes or modifications in construction of this device which are not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

• This device complies with part 15 of the FCC Rules.

• Operation is subject to the following two Conditions :

   (1) This device may not cause harmful interference, and
   (2) this device must accept any interference received, including interference that may cause undesired operation.

Note

   ■ This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Riles. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to correct the interference by one or more of the following measures:
   - Reorient or relocate the receiving antenna.
   - Increase the separation between the equipment and receiver.
   - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
   - Consult the dealer or an experienced radio/TV technician for help.
