Performance Features

Your **Loewe MediaVision 3D** offers you convenient access to your media collection. It plays Blu-ray Discs™ in 2D/3D format, audio CDs and video DVDs. You can also play digital video, photo and music files from a USB stick and from data discs.

Connection options

2x USB 2.0 (connection from Flash memory or hard disc) 2x HDMI IN (HDMI input) without CEC) HDMI OUT (HDMI output) with CEC) VIDEO OUT (Video output) COMPONENT VIDEO OUT (Component-video output) AUX IN (Analog audio input stereo L/R) AUX OUT L/R (Analog audio output stereo L/R) DIGITAL IN (digital audio input) LAN (Network connection) PHONE (Headphone output) ANTENNA FM (FM Radio Antenna) AUDIO-LINK (cabled system connection to Loewe sound systems) WIRELESS AUDIO-LINK (wireless system connection to Loewe sound systems)

Blu-ray[™]/CD/DVD Player

Playing Blu-ray™ 2D and 3D discs Playing audio CDs, CD-R and CD-RW discs Playing DVD video, DVD-ROM and DVD-RW discs DVD upscaling (720p/1080p) Operation via touch-sensitive sensor buttons on the device and **Assist** remote control

Media management

DLNA streaming client BD/DVD/CD/File Title recognition via Internet databases Displaying ID3v1 and ID3v2 meta data Displaying album graphics Importing meta data from the Internet Importing audio CDs

Music playback

Integrated 5.1 Dolby Digital Decoder Playing MP3, WMA, AAC audio files Repeating titles, tracks or directories Random playback Playing wired audio sources at AUX IN

Video playback

Playing DivX(HD) video files Displaying subtitles Resume function

Photo display

Displaying JPEG, PNG photo files Slide show with music

iPod support

iPod docking station Audio playback Easy control by remote control Loewe Assist Charge battery

Radio

FM radio with RDS display via cable or terrestrial means Memory for 50 radio stations

Use with other Loewe system components

Connection of Loewe flat TV sets via Digital Link HD (HDMI CEC) (from chassis L271x - a software update for the TV set might be required) and operation with a single **Assist** remote control - also for concealed set-up of the **MediaVision 3D**.

Welcome

Thank you,

for choosing a Loewe product. We are happy to have you as a customer. At Loewe we combine the highest requirements regarding technology, design and ease of use. This applies equally for TV, DVD, video, audio and accessories. Neither technology nor design is an end in itself, but both are intended to provide our customers with the best possible audio and visual experience. Our design is not influenced by short-term, fashionable trends. You have, after all, purchased a high-quality piece of equipment which you do not want to tire of tomorrow or the day after.

Scope of supply

- MediaVision 3D
- Assist remote control with 2 batteries
- HDMI cable
- Antenna
- Cinch cable for digital sound
- Stereo-Cinch cable
- Adapter cable for centre channel of the TV (art. no. 009-70784.001)
- Adapter cable for centre channel of the TV (art. no. 009-71387.001)
- Network cable
- Mains cable
- These instructions for use

Optional extensions

- Loewe TV set with HDMI input
- Loewe Individual Sound Subwoofer / Highline / Compact
- Loewe Individual Sound Speaker

Set-up

- Place unit on a stable, even surface.
- Do not set up the unit near strong heat sources or in direct sunlight.
- If setting up in a shelf or a closed cupboard: Leave at least 2.5 cm clearance around the unit, so that the air can circulate unhindered and there is no heat backup.
- The picture and sound of a TV set, a player or a radio in the vicinity can be distorted. If this is not the case, do not place the unit in the direct vicinity of these devices.
- Set up the device so that the infrared signal of the remote control can reach the display of the player without hindrance (or if this is not possible, see "Digital Link HD (HDMI CEC)" page 40).
- Do not place any strong artificial light source in front of the unit. This could have a detrimental effect on the infrared reception.
- Incorrect voltages can damage the unit. This device may only be connected to a powersupply with the voltage and frequency indicated on the type plate.
- Pull out the power cable during thunderstorms. A voltage surge caused by lightning conducted through the mains could damage the unit.
- If the unit is not to be used for an extended period, the plug should also be disconnected from the mains.
- The power plug of the TV set must be easily accessible so that the TV can be disconnected from the power supply at all times.
- Position the mains cable in such a way that it can not be damaged. The power cable may not be kinked or laid over sharp edges, stood on or exposed to chemicals; the latter also applies to the unit as a whole. A power cable with damaged insulation can cause electric shocks and poses a fire risk.
- When you want to unplug from the mains, pull on the plug housing rather than on the cable. The cables in the mains plug could otherwise be damaged and could cause a short-circuit when plugged in again.

Please note and follow the safety information on the following pages.

For your safety

For your safety, and to avoid unnecessary damage to your unit, please read and follow the safety advice below. Please keep the safety information in a safe place.

Use for the intended purpose and ambient conditions

This unit is intended exclusively for playing visual and audio signals. It is designed for living or office rooms and may not be used in rooms with a high level of **humidity** (e.g. bathroom, sauna) or a high **dust concentration** (e.g. workshops).

The terms of the warranty only cover the intended use of the unit.

If the unit is used outdoors, make sure that it is protected from **moisture** (rain, drips, sprayed water or dew).

High humidity and dust concentrations lead to leakage currents in the device, this can result in a contact risk with voltages or a fire.

If you have moved the unit out of the **cold** into a warm environment, leave it switched off for about an hour to avoid the formation of **condensation**.

Ensure that your system (**MediaVision 3D**, TV set and other connected components, if any) are switched off before you connect or disconnect other devices or speakers.

Protect your device from:

- Water, dampness, dripping and sprayed water or steam.
- Knocks and mechanical stress.
- Magnetic and electric fields.
- Cold, heat, direct sunlight and high temperature fluctuations.
- Dust.
- Covers that inhibit ventilation.
- Interference with the internal workings of the unit.

Do not place objects containing liquids on top of the unit.

Candles and other open flames must be kept away from the unit at all times to prevent the spread of fire.

Do not cover ventilation slits with magazines or rugs. Pay attention to curtains etc. here, for example.

ATTENTION: TO PREVENT THE RISK OF AN ELECTRIC SHOCK, DO NOT REMOVE THE COVER. THERE ARE NO PARTS INSIDE THE UNIT THAT CAN BE REPAIRED BY THE USER. REPAIRS SHOULD ONLY BE CARRIED OUT BY A LOEWE DEALER.

Only use Original accessories and spare parts from Loewe.

Supervision

Do not let **children** loiter unsupervised around the device. Do not let children play in the immediate vicinity of the device. Do not operate your **MediaVision 3D** unsupervised. Disconnect the device from the mains if absent for a longer period.

Cleaning

Only clean your unit with a slightly damp, soft, clean cloth (without any aggressive or scouring cleaning agents).

Volume

Loud music can result in impaired hearing. Avoid extreme volumes, especially over longer periods and if you use headphones.

About these operating instructions

The information in these instructions refers to the Loewe product MediaVision 3D.

Unless stated otherwise, the instructions refer to the operating elements on the **Assist** remote control.

Paragraphs beginning with the mass symbol indicate important hints, tips or conditions for perfect operation.

Terms which you will find in the menu or printed on the unit are printed in **bold** type.

In the functional descriptions, the necessary operating elements are arranged to the left of the text containing the handling instructions.

The diagrams in these operating instructions are only by way of example. However, the actual display can differ.

MediaVision 3D as an audio system

This is the recommended configuration in conjunction with all TV sets from Loewe or other manufacturers. The audio signals are processed via **MediaVision** in this configuration.

Connect the **HDMI OUT** socket of the **MediaVision 3D** to an **HDMI IN** socket on your Loewe TV set using the HDMI cable provided.

If your TV set does not have an HDMI IN socket, connect the three sockets **COM-PONENT VIDEO OUT** of the **MediaVision 3D** with three video-compatible Cinch cables to the **COMPONENT IN** sockets on your TV set.

You can also make the connection to a TV set with a video-compatible Cinch cable via the **VIDEO OUT** socket.

Use an RJ-45 network cable to connect **MediaVision 3D** to a network connection (e.g. Switch or DSL router) with a connection to the Internet/Homenetwork. Use an Audio-Link cable to connect the **AUDIO-LINK** socket of your **Media-Vision 3D** to a compatible socket of the Loewe subwoofer. Should you wish to reproduce the centre channel through your TV set, use the adapter provided (art. no. 009-70784.001). Connect it to the **AUDIO-LINK** socket of **MediaVision 3D** and the AUDIO-LINK cable to the subwoofer, as well as the Centre-IN socket of the TV set. (see page 21).

To be able to reproduce the sound of the TV set, e.g. DVB radio, via your **MediaVision**/subwoofer system, create an audio connection between the TV set and MediaVision 3D. Where possible, you should use the cinch cable for digital sound; connect it to the AUDIO DIGITAL OUT socket on the TV set and to the **DIGITAL IN** socket on the **MediaVision**.

Alternatively, you can connect the analog stereo audio signal of the TV set via a stereo Cinch connection to the sockets **INPUT AUX R/L** on **MediaVision**.

Connect the **ANTENNA FM** socket of the MediaVision 3D to the antenna provided. Plug the small plug of the mains cable into the rear of the unit (page 7) and then plug the large plug of the mains cable into a 220-240V 50/60 Hz socket.

MediaVision 3D as an audio system (SL155)

This is the recommended configuration with **MediaVision 3D** as an audio system in conjunction with Loewe **Connect ID** (chassis SL155; TV as centre and with HDMI-ARC: Audio Return Channel). The audio signals are processed via **MediaVision** in this configuration.

Connect the **HDMI OUT** socket of the **MediaVision 3D** to an **HDMI 1** socket on your Loewe TV set using the HDMI cable provided.

Use an RJ-45 network cable to connect **MediaVision 3D** to a network connection (e.g. Switch or DSL router) with a connection to the Internet/Homenetwork. Connect the **ANTENNA FM** socket of the MediaVision 3D to the antenna provided. Use an Audio-Link cable to connect the **AUDIO-LINK** socket of your **Media-Vision 3D** to a compatible socket of the Loewe subwoofer. Should you wish to reproduce the centre channel through your TV set, use the adapters provided (art. no. 009-70784.001 / 009-71387.001). Connect the adapter 009-70784.001 to the **AUDIO-LINK** socket of **MediaVision 3D** and the AUDIO-LINK cable to the subwoofer, as well as the Centre-IN socket of the adapter 009-71387.001 on the TV set. To be able to reproduce the sound of the TV set, e.g. DVB radio, via your **MediaVision**/subwoofer system, set the option **TV input** to **HDMI output -ARC** (page 21).

Plug the small plug of the mains cable into the rear of the unit (page 7) and then plug the large plug of the mains cable into a 220-240V 50/60 Hz socket.

MediaVision 3D as an audio system (SL2xx)

This is the recommended configuration with **MediaVision 3D** as an audio system in conjunction with Loewe TV sets with chassis SL2xx (TV as centre and with HDMI-ARC: Audio Return Channel). The audio signals are processed via **MediaVision** in this configuration.

Connect the **HDMI OUT** socket of the **MediaVision 3D** to an **HDMI 1** socket on your Loewe TV set using the HDMI cable provided.

Use an RJ-45 network cable to connect **MediaVision 3D** to a network connection (e.g. Switch or DSL router) with a connection to the Internet/Homenetwork. Connect the **ANTENNA FM** socket of the MediaVision 3D to the antenna provided. Use an Audio-Link cable to connect the **AUDIO-LINK** socket of your **Media-Vision 3D** to a compatible socket of the Loewe subwoofer. Should you wish to reproduce the centre channel through your TV set, use the adapter provided (art. no. 009-70784.001). Connect it to the **AUDIO-LINK** socket of **MediaVision 3D** and the AUDIO-LINK cable to the subwoofer, as well as the Centre-IN socket of the TV set. (page 21).

To be able to reproduce the sound of the TV set, e.g. DVB radio, via your **MediaVisi**on/subwoofer system, set the option **TV input** to **HDMI output -ARC** (page 21).

Plug the small plug of the mains cable into the rear of the unit (page 7) and then plug the large plug of the mains cable into a 220-240V 50/60 Hz socket.

Connection

MediaVision 3D as a Player

The audio signals are processed via your TV set in this configuration. **MediaVision** serves as an audio and video source *.

Connect the **HDMI OUT** socket of the **MediaVision 3D** to an **HDMI IN** socket on your TV set using the HDMI cable provided.

Go to the **Audio** menu and set the option **Preamplifier** to **off** (page 21) Use an RJ-45 network cable (available from your dealer) to connect **MediaVision 3D** to a network connection (e.g. Switch or DSL router) with a connection to the Internet/Homenetwork.

Connect the **ANTENNA FM** socket via an FM antenna cable (available from your dealer) to an antenna socket, or use the antenna provided at this socket. Plug the small plug of the mains cable into the rear of the unit (page 7) and then plug the large plug of the mains cable into a 220-240V 50/60 Hz socket.

Using the Assist remote control

To insert or change the batteries, press where the arrow is embossed on the casing. While doing so, simply slide the battery compartment lid down and remove it. Insert alkaline manganese batteries LR 03 (AAA) and ensure the correct position of + and -. Slide the cover on again from the bottom.

- Do not insert rechargeable batteries in the battery compartment of the remote.
- The batteries used must not be exposed to excessive heat such as sunlight, fire or similar!

Setting up the Assist remote control

Other devices

You can operate various Loewe devices using the **Assist** remote control. The unit buttons **REC** - **DVD** - **AUDIO** can be set for this.

Press the required unit button and the Stop button simultaneously for 5 sec. until the corresponding LED indicator light flashes twice.

Then select the two-digit unit code from the table:

Device	Code	Factory setting
Loewe ViewVision DR+ DVB-T	13	REC
Loewe BluTechVision	15	
Loewe TV Radio digital	19	
Loewe Mediacenter	20	
Loewe BluTechVision 3D	21	DVD
HDMI CEC Modus	22	
Loewe Sound Projector SL	25	
SoundBox	28	
SoundVision	29	
Air Speaker	30	
Loewe MediaVision 3D	35	AUDIO
Restore defaults	99	

Sound functions

It is possible to set the devices with which the buttons with the sound functions (V+/-, Mute and sound mode) should work.

Press the device button **TV** and, at the same time, the button with the single digit function code from the list, for 5 sec. until the LED Display flashes twice.

Function	Code	Figure
Loewe MediaVision $m{\star}$	3	page 11, 12,13
Loewe Mediacenter	4	
Loewe TV	5	page 14
Loewe Soundprojector	6	

★ Default setting

Operating Loewe Equipment

Using the remote control for a Loewe TV set

Press **TV** button; the LED Display above it lights up for approx. 5 seconds

Using the remote control for a Loewe recorder

Press the **REC** button; the LED Display above it lights up for approx. 5 seconds

Using the remote control for BluTechVision 3D

Press the **DVD** button; the LED Display above it lights up for approx. 5 seconds

Using the remote control for MediaVision 3D

Press the **AUDIO** button; the LED Display above it lights up for approx. 5 seconds

Every time a button is pressed, the LED indicator lights up for the selected operating mode to allow you to check (TV - REC - DVD - AUDIO).

Please refer to the respective operating instructions on how to operate the individual devices.

The corresponding LED indicator light flashes twice.

Connecting to the mains supply

Plug the mains plug (page 7) into a mains socket 220-240V/50-60 Hz.

Switching on/off

Set the remote control for **MediaVision 3D** Mode by pressing the **AUDIO** button briefly.

Your **MediaVision 3D** switches on. If you have connected a Loewe TV set (L27xx/SL1xx/SL2xx) via HDMI, this will then switch on as well. Otherwise, switch your TV set on and set the respective AV programme slot.

If necessary, you will have to set the operation of the MediaVision 3D for the AV socket used on your TV set (see, for example, under "Operating additional devices" in the relevant instructions for use of your TV set).

As soon as **MediaVision 3D** is ready for operation, the **operating display** lights up green (page 7).

To switch off the device, press the OFF/ON knob on the **MediaVision 3D** or once again on the **Assist** remote control .

Digital Link HD

With Digital Link HD, Loewe TV sets as well as other TV sets supporting the CEC standard send the remote control signals via the HDMI connection from the TV set to the **MediaVision 3D**. Select this function in the menu as described on page 20.

 \bigcirc

The TV set must be switched on.

Select the AV programme slot for HDMI on the TV set.

As long as HDMI is selected as a programme slot, most TV remote control commands (**ASSIST** in TV Mode) are communicated to the connected HDMI device. However, the volume, sound ON/OFF and sound adjustment continue to respond to commands from the TV set. The AUDIO commands (**ASSIST** in AUDIO Mode) are <u>not</u> transmitted from the TV.

If your press the **TV button** for a longer time, you can toggle between HDMI and TV operation. Briefly pressing the **TV button** switches back to TV Mode.

The **TV button** (press briefly) can be used to switch to the last station viewed in TV Mode and quit the device control.

A software update might be necessary for your Loewe TV set. Please contact your dealer.

Digital Link HD (HDMI CEC)

With Digital Link HD, Loewe TV sets (chassis L271x, software \geq V9.2, SL 1xx, SL2xx) transmit the remote control signals signals via the HDMI connection from the Loewe TV set to compatible accessory units, e.g. **MediaVision 3D**. Digital Link HD is recommended if you wish to set up **MediaVision 3D** so that it is concealed and the complete device control is to occur via the Loewe TV set.

First set up the HDMI CEC function for the **Assist** remote control as described on page 15 with code 22 on the required device button (e.g. DVD).

Then assign the Digital Link HD function to the HDMI interface used on the TV set by pressing the button set above (e.g. DVD) for 5 seconds.

▲ ▼ Select required unit (e.g. MediaVision).

Press **OK** to confirm.

The signals of the **Assist** remote control are now sent from the Loewe TV set to **MediaVision 3D**, if the relevant button on the unit (e.g. DVD) has been pressed beforehand.

A software update might be necessary for your Loewe TV set. Please contact your dealer.

Navigation in the menu

The arrow keys of the **Assist** remote control are shown as follows in these instructions for use:

The arrows correspond in the text: " \checkmark \checkmark \checkmark ".

The OK- button on the remote control is shown in the text as **OK**.

Call up the Main Menu.

- ▲ ▲ ✓ Select desired option.
- Move Back in the menu.
- END Close the menu.

Press OK to confirm.

Main Menu

(MEDIA)

The Main Menu of the **MediaVision 3D** is shown on the screen of the TV set connected. Here you can select the required functions.

▲ ► ▲ ▼ Select the desired function.

Press **OK** to confirm.

- Movie Display the Movie Menu (page 34) for playing video files or the Disc Menus
- Music Display the Music Menu (page 36) for playing audio files
- Photo Display the Photo Menu (page 37) for displaying photo files
- Input Display the Input Menu (page 41) for playing wired audio sources
- FM Radio Display the FM Radio Menu (page 39) for Radio Mode
 - Setup Display the Setup Menu (page 17), to make settings

- To call up the Main Menu, close any other menus that might be open with END.
- The menu items Movie, Music, Photo can be selected if a corresponding medium is available.

Setup Menu

The **Setup** Menu allows you to make any settings and adjustments that might be necessary to e.g. your TV set.

Display	TV Aspect Ratio	: 16:9 Original
Language	Resolution	: Auto
Audio	1080p Display Mode	: 50Hz
Dolby PL II	HDMI Color Setting	: YCbCr
Lock	3D Mode	: On

Others		

(END)

- Call up the Main Menu.
- ✓ ► ▲ ▼ Select the Setup option.
- Select desired category.
- ▶ ▲ ▼ Select desired subcategory.
- ▲ Make desired setting.

Press OK to confirm.

Close the menu.

If the blue bar for the menu selection appears in the first level (left), you will see the settings currently valid in the overview in the third level (right).

Language Menu

Your **MediaVision 3D** attempts to automatically set the correct menu language via the HDMI-CEC connection to the same language as your Loewe TV set. You can also set the required menu language manually.

- ✓ ► ▲ ▼ Select the Setup option.
- ▲ ▼ Select the Language option. Press OK to confirm.
- Select the **Display Menu** option.

Press OK to confirm.

Press OK to confirm.

(END) Close the menu.

Disc languages

MEDIA

Select a language for the menu, the sound and the subtitles of the disc. If a language different to the "original" of the disc version is to be used, select this here if available on the disc.

- ▶ ▲ ▼ Select option Disc Menu, Disc Audio or Disc Subtitle.
- ▶ ▲ ▼ Select desired option.
 - OFF Switch off disc subtitles
- **Original** The original language of the disc is selected. **Other** Select another language (page 44).

Press **OK** to confirm.

(END)

Close the menu.

Menu Display

In the **Display** Menu you can set the screen imaging of your **MediaVision 3D** on your TV set.

These settings are automatically made by using the HDMI socket.

- ▲ Select the Setup option.
- ▲ ▼ Select **Display** option.

Picture format

- ▶ ▲ ▼ Select TV Aspect Ratio option.
- **4:3 Letterbox** Select this setting if a standard TV set with 4:3 picture format is connected. Recordings in wide-screen format appear with a black bar at the top and bottom of the screen
- **4:3 Panscan** Select this setting if a standard TV set with 4:3 picture format is connected. The picture fills the entire screen, but crops the area on both sides if required.
- **16:9 Original** Select this settings if a wide-screen TV set with 16:9 picture format is connected. The 4:3 picture in the original picture format 4:3 is displayed with black bars on the left and right of the screen.
- **16:9 Full screen** Select this settings if a wide-screen TV set with 16:9 picture format is connected. The 4:3 picture is stretched horizontally so as to fill out the entire screen.

Press **OK** to confirm.

Close the menu.

END

Resolution

You can set the resolution of the video signal at the **HDMI OUT** and **COMPONENT VIDEO OUT** socket.

- ► ► Select the option **Resolution**.
- Auto Recordings in wide-screen format appear with a black bar at the top and bottom of the screen
- 576i Output in the 576 line Interlaced Mode (only component)
- 576p Output in the 576 line Progressive Mode
- 720p Output in the 720 line Progressive Mode
- 1080i Output in the 1080 line Interlaced Mode
- 1080p Output in the 1080 line Progressive Mode (only HDMI)

1080p display mode

Select the option **24Hz** to freely show Movies on HDMI-compatible TV sets with 1080 lines at 24Hz frame rate.

- ▶ ▲ ▼ Select the option **1080p display mode**.
- 24HZ Frame rate 24Hz for cinema Movies
- 50HZ Frame rate 50Hz for TV Movies
- Picture disturbances can occur when changing between video and Movie material in the 24Hz setting. In this case, select the setting 50Hz.
- Even if the option **1080p display** is set to **24Hz**, the actual frame rate of the video output will be specified at 50 Hz or 60 Hz depending on the format of the video source, if your TV set does not support the resolution 1080/24p.

HDMI colour setting

Select the video output signal depending on which video output socket you are using (page 11).

- ▶ ▲ ▼ Select the option HDMI colour settings.
- YCbCr Socket COMPONENT VIDEO OUT RGB Socket HDMI OUT

3D Mode

You can switch the 3D display of BD discs on/off.

- ► ► select the option **3D Mode**.
 - **ON** 3D playback at **HDMI OUT**
 - **OFF** 3D playback in 2D

Dimming the display

You can reduce the brightness of the display.

- ► ► Select the option **Display Dimmer**.
 - **ON** The display brightness is reduced
 - **OFF** The display brightness is normal

Audio Menu

You can make various sound settings in the Audio Menu.

MEDIA

Call up the Main Menu.

- ✓ ► ▲ ▼ Select the Setup option.
- ▲ ▼ Select the **Audio** option.

Speaker set-up

If you have connected a speaker system to **MediaVision** (page 11), you can make the necessary settings here.

✓ ► ▲ ▼ Select desired option.

Speaker Select the speaker to be set

- Connection Select the limit frequency of the selected speaker (see its technical data). To use the TV loudspeaker as the centre loudspeaker, select the option Center (page 21) in the Speaker settings and select the option TV in the Connection settings.
 - **Volume** Set the volume level of the selected speaker so that you can hear it at the listening position with the same volume as the other speaker
 - Distance Set the distance from the speaker to your listening position
 - Test Switch on the test signal for setting the volume off/on

Audio delay (HD AV Sync)

If you use the HDMI socket, you can set an audio delay (for e.g. lip synchronous sound transmission).

► ► Set a value between **0** and **300 ms** (for the configuration sown in page 11 set 100 ms).

DRC (Night Mode)

You can use the DRC function to limit the dynamics (in other words, the difference between the loudest and quietest sounds). In this way, you can also play a Movie with lower volume differences (e.g. at night).

- Auto Select this option if you wish to play audio signals with the coding Dolby True HD with reduced dynamics
- OFF Audio signals are played with the full dynamic range
- **ON** Select this option if you wish to play audio signals with the coding Dolby Digital or Dolby Digital Plus with reduced dynamics

Wireless Speaker

A system interface **Wireless Audio-Link** is integrated in your **MediaVision 3D**. You can use this to connect your compatible Loewe subwoofer to **MediaVision 3D** without any annoying cables. This connection must be registered once.

Call up the Setup Menu.

- ► ► Select the option Wireless Speaker. Press OK.

Display Language Audio Dalby P. II Lock Network Others	Speaker Setup Pairing of Wireless Speakers Start pairing with OK, Then you have one mi- nuct to press pairing button at your subwoofer to contrm.

Select the **On** option. Press **OK** to confirm.

You now have a minute time in which you can press the button for the coupling mode for your compatible Loewe subwoofer. A notice will appear if the registration is successful. If the registration is not successful, please try again and reduce the distance between the subwoofer and **MediaVision**.

Confirm with **OK**.

Loudness

If you activate the setting, the frequency response will be corrected in relation to the volume (hearing compensated volume).

- **ON** Hearing compensated volume adjustment on
- OFF Linear frequency response

Preamplifier

This setting allows you to define how the audio signals are processed.

- **On, with HDMI** Select this option if **MediaVision** is to process the audio signals (page 11 to 13). Control via the HDMI connection (CEC) is possible
 - **On** Select this option if **MediaVision** is to process the audio signals (page 11 to 13). Control via the HDMI connection (CEC) is not possible
 - **Off** Choose this option if the connected TV device processes the audio signals (page 14)

TV input

You can define the input for the TV sound used for the option **Preamplifier: On, with HDMI**.

- HDMI Out ARCSelect this option if the sound signal is fed via the
audio feedback channel of the HDMI connection.
Your TV set must support this function (Loewe TV sets
from chassis SL155 / SL2xx).
 - DIGITAL IN Select this option if the sound signal is fed in at the DIGITAL IN socket.
 - AUX IN Select this option if the sound signal is fed in at the AUX IN socket.

Dolby PL II Menu

You can set the sound format for a stereo audio signal in Dolby-Pro Logic II Mode for surround sound. Use this option if you have connected a speaker system to **MediaVision** (page 11 to 13).

(MEDIA) Ca

Call up the Main Menu.

▲ ► Select the Setup option. Press OK to confirm.

Select the **Dolby PL II** option. Press **OK** to confirm.

Dimension This allows you to set the stereophonic/Surround effect.

Center Width This allows you to set the width of the centre channel, or accentuation of the centre speaker.

Panorama This allows you to expand the stereo width of the front speaker.

Lock Menu

You can specify playback restrictions in the Lock Menu.

MEDIA

- Call up the Main Menu.
 - ✓ ► ▲ ▼ Select the Setup option.

Password set-up

Please set your personal password.

- Select the option New.
- Use the numerical buttons to enter a four-digit password.

Confirm the new password.

Press **OK** to confirm.

If the entry is incorrect before you press **OK**, repeatedly press to delete the numbers.

Resetting the password

If you have forgotten the password or wish to deactivate the password function, vou can reset it.

Remove every medium (disc, USB) and close all menus.

Call up the Main Menu.

- ♦ ▶ ▲ ▼ Select the Setup option.
- ▲ ▼ Select the option **Lock**.

Use the numerical buttons to enter the code number (page 43).

The password protection is now deactivated. If necessary, set up a new password, as described under "Password set-up".

DVD Rating

This function restricts the playback of DVDs with adult-only content, if these contain a corresponding code. You will be prompted to enter the password to play the content in full.

- ✓ ► ▲ ▼ Select the option DVD Rating.
- Press button.

Use the numerical buttons to enter the current four-digit password.

Press **OK** to confirm.

▲ ▼ Select desired option.

Cancel The disc is not played completely

- Level 1 to 8 Only the scenes of the inserted discs corresponding to the assigned security level or whose level value is below this are played. Level "1" has the most playback restrictions
 - Not all discs include a classification.

Blu-ray Disc Rating

This function restricts the playback of Blu-ray Discs™ with adult-only content, if these contain a corresponding code. You will be prompted to enter the password to play the content in full.

- ✓ ► ▲ ▼ Select the option Blu-ray disc rating.
- Press button.

Use the numerical buttons to enter the current four-digit password.

Press OK to confirm.

Use the numerical buttons to enter the three-digit code for the age rating (you can find this code on the Blu-ray Disc[™] or on the accompanying material.

Press **OK** to confirm.

- **255** The disc is played fully
- **0 to 254** Only the scenes of the inserted discs corresponding to the assigned security level or whose level value is below this are played. Code "0" has the most playback restrictions
 - Not all discs include a classification

Area Code

To utilise the playback restrictions for the discs, enter the area code for the relevant country (for the list see page 44).

✓ ► ▲ ▼ select option Area Code.

Press button.

Press **OK** to confirm.

Press OK to confirm.

Network Menu

Your **MediaVision 3D** can be connected via the **LAN** connection on the rear to a home network (LAN) with Internet connection (page 11 to 13). That means you can use the BD-LIVE[™] service, which provides you with optional accompanying material from the manufacturer of the Blu-ray Disc[™].

In the **Network** Menu you can make the settings required for your home network.

Set network connection automatically

If your home network has a DHCP server (e.g. a DSL router), your **MediaVision 3D** can automatically set all network parameters.

MEDIA

Call up the Main Menu.

- ✓ ► ▲ ▼ Select the Setup option.
- Select the Network option.
- ► ► Select the Connection settings s.

Press OK to confirm.

The Connection Settings Menu appears.

Connection Se	tting	
IP Mode	Dynamic	Static
DNS Se	rver Auto	Manual
	ОК	Cancel

Press OK to confirm.

Your **MediaVision 3D** will now attempt to establish a connection to the Internet router in your home network. The standard setting shown above (IP Mode: Dynamic, DNS server: Auto) is used for the automatic search for the network parameters.

If a dynamic IP address has been assigned, a corresponding message will appear.

Connection Setting	9
•	Setting Word Dynamic IP completed, For the connection test, press Test',
	Test OK

✓ Select the option **Test** to perform a connection test.
 Press **OK** to confirm.

Call up the Main Menu.

- ► ► Select the option Blu-ray Disc Storage Select.
- Built-In Storage Memory integrated in the device
 - USB Storage Memory connected to the USB socket of the device Press OK to confirm.

Blu-ray Disc Storage Clear

You can delete the memory used for the BD-LIVE function (page 33) so that more space is freed up for new files.

- MEDIA Call up the Main Menu.
 - ✓ ► ▲ ▼ Select the Setup option.

 - ► ► Select the option **Blu-ray Disc Storage Clear**.

Press **OK** to confirm.

Built-In Storage Memory integrated in the device

USB Storage Memory connected to the USB socket of the device

• Confirm query prompt with **Yes**.

Press OK to confirm.

DivX® VOD

You will receive the DivX® VOD (Video On Demand) registration code for borrowing and buying Movies via the DivX® VOD service.

- MEDIA Call up the Main Menu.
 - ✓ ► ▲ ▼ Select the Setup option.

 - ► ► Select the option **DivX® VOD**.
 - **Register** The registration code valid for your device is displayed. You can register for the VOD service in the Internet at:

http://vod.divx.com. You can also find further information on the use here.

Deregister The deactivation code valid for your device is displayed.

Press OK to confirm.

All Movies purchased via DivX® VOD can only be played on this device.

Auto Power Off

To save energy, you can set the device so that it switches off automatically after a certain time without playback.

- MEDIA Call up the Main Menu.
 - ✓ ► ▲ ▼ Select the Setup option.

 - ▶ ▲ ▼ Select the option Auto Power Off.
 - **OFF** The device also remains switched on after a longer period without use
 - **ON** After 30 minutes without function, the device will automatically switch off to Standby Mode

Press OK to confirm.

Initialize

You can reset the device to the default settings.

- (MEDIA) Call up the Main Menu.
 - ✓ ► ▲ ▼ Select the Setup option.

 - ▶ ▲ ▼ Select the option Initialize.

Press **OK** to confirm.

• • Confirm query prompt with **Yes**.

Confirm with **OK**.

Software updating

Display software status

(MEDIA)

Call up the Main Menu.

- ▲ ► Select the Setup option.
- ▲ ▼ Select the option **Others**.

► ► Select the option **Software**.

Press **OK** to confirm.

You can see the current software in the device on the right next to the entries **MAIN VER** and **SERVO VER**.

Press OK to confirm.

Downloading new software

You can download a software update suitable for your device from the Loewe Support Portal, if required.

- In the Internet browser of your computer, enter the address: http://support.loewe.tv/de
- If you still do not have an independent access to the Loewe Support Portal, set it up now. Click on <u>Register now</u>. Fill out the information for your account and then click on <u>Create account</u>. Please check whether all data is correct and then click on <u>Create account now</u>. Shortly thereafter, you receive an email at the already specified address. Click on the link given above to confirm your registration. On successful registration, you receive an email for confirmation.
- Enter your email address and a password under Access to your account.
- Click on **Register Loewe product System MediaVision 3D** and entered the requested data for your device.

Download the file shown in the **Software** area.

Unzip the downloaded file (e.g. with 7-zip) and copy each of the unzipped files to a different USB stick. Carry out the update with the file "DSP_*.HEX" last of all.

The file system of the USB sticks must be formatted in the format FAT32 and only one partition may be present. Other file systems are not supported by the device for the software update.

Updating device software

AUDIO

Switch on your MediaVision 3D (and the TV set connected to it).

Remove an inserted disc.

MEDIA Call up the Main Menu.

Insert the USB stick with the two update files in the USB socket of the **MediaVision 3D** and wait until the device has recognised the USB stick.

The software found on the USB stick is checked and a message appears. If the software is more recent than that on the device, you can then start the update.

✓ Select Yes to confirm the query prompt.

Press **OK** to confirm.

The update process starts and you can see a progress display.

The USB stick or the mains cable must <u>never</u> be disconnected from the device during the updating process!

The device switches off after a successful update.

Then initialise the set as described on page 25.

- The firmware update is only intended for the Loewe MediaVision 3D, art. no. 51201!
- Only use the software approved by Loewe for your device!
- You can find the model designation on the rear of the device.
- If another device from Loewe or from a different manufacturer is loaded with software not intended for the device, this can lead to damage. Any guarantee and recourse claims for the device shall consequently lose their validity.
- The firmware update does not result in any significant changes to the technical functions of the device.
- You can download an up-to-date version of the instructions for use as a PDF file from the Loewe Website: <u>http://support.loewe.tv/de</u> <u>Library Instructions for Use</u> This is especially recommended after a software update.

Prerequisites

Once you have carried out the relevant steps described in the chapters "Set-up", "Connection" and "Start-up", switch on **MediaVision 3D** and any connected devices. To reproduce 3D content, you require a 3D-compatible TV set with 3D glasses compatible with this, as well as Blu-ray 3DTM media.

Playable discs

Only use discs that conform with the current standards. You can recognise these from the logos attached.

Disc type		Recording format	Contents	Disc size	
Blu-ray™/ Regional code Blu-ray 3D™ ** / ALL		Video Mode	Audio + Video	12 cm (5″)	
BD-RE/BD-R *		-	(Movie)		
DVD Video Regional code ** / ALL		Video Mode	Audio + Video (Movie)	12 cm (5")	
DVD±RW/DVD±R *		Video Mode	Audio + Video (Movie)	12 cm (5")	
Audio CD *		Audio CD (CD-DA)	Audio	10 cm (F")	
CD-RW	/CD-R *	Audio CD (CD-DA)	Audio	12 (11 (5)	

* only finalised discs

** for the regional code applicable for your set, see the back of the set

Regional code (Country code)

The regional code of this player is printed on the rear of the unit. Only Blu-ray™ or DVD discs with this regional code or with the regional code "ALL" can be played. The regional code on the labels of some DVDs indicates what type of DVD-Player can play these discs. If you play other discs, an error message will be displayed on the TV screen. The label with the regional code is missing on some discs, although it cannot be played in all regions.

Symbols in these instructions for use

BD Blu-ray Disc™ DVD-V DVD video disc CD Audio CD DivX DivX files MP3 MP3 files WMA WMA files JPEG JPEG/PNG files

Handling discs

Do not touch the playing side of the disc. Hold the disc at the edges so as not to touch the surface with your fingers. Do not attach paper or adhesive tape onto either side of the disc.

- Discs may not play if the manufacturer of the disc has implemented new standards, technology or functions.
- Discs cannot be played if the disc is damaged or dirty or if the lens of the player is contaminated with condensation.
- If you write a disc with a PC, it may be the case that the disc cannot be played owing to the application software settings, even if your format is compatible. (You can obtain more information from your software provider).
- Depending on the recording device or the CD-R/RW- (or DVD±R/±RW-) disc itself, some CD-R/RW- (or DVD±R/±RW) discs cannot be played with this device.
- Do not use CDs with unusual shapes (e.g. heart shaped or octagonal). Otherwise malfunctions or damage cannot be ruled out.
- Finger prints and scratches on the disc can impair the playing quality. Handle the discs carefully.

Inserting discs

The disc drawer of your **MediaVision 3D** is located on the front (page 7). To open the disc drawer, press the sensor button \triangle on the unit. Insert the disc in this drawer. The printed side of the disc should face upwards. Press the sensor button \triangle again to close the disc drawer.

Ejecting the disc

Press the sensor button **A** again to remove the inserted disc.

In the Title Menu you can - if this supports the disc currently being played - set a selection of options, e.g. title / chapter selection or subtitles (see also page 29).

- ▲ ▼ Select option.
- ♦ Set option.

Press OK to confirm.

If the child protection level of the disc is set higher than that for the Movie classification, the password must be entered (see **Rating** on page 22).

Searching

BD DVD-V DivX CD

Select the search direction and speed:

- Press longer: Rewind. Increase the playback speed backwards by pressing several times.
 - Press longer: Fast forwards. Increase the playback speed forwards by pressing several times.

The speed and direction are indicated as an arrow.

Quit Search Mode and continue play.

Freeze frame and picture-for-picture playback

BD DVD-V DivX

- Pause Stop play.
 Press Pause again: Browse forwards by frames.
 - Resume play

Slow motion

BD DVD-V DivX

Pause: Stop play.

Close	Save settings and guit menu

BD-LIVE[™]

Your **MediaVision 3D** supports the **BD-LIVE™** function (Blu-ray[™] Profile 2.0). This allows you to access interactive content provided via the Internet by some Blu-ray Discs[™] providers.

Insert the Blu-ray Disc[™] with the **BD-LIVE[™]** function.

- The BD-LIVE™ function requires a broadband Internet connection. Set up the access to your home network as described from page 23.
- Activate the option whereby your MediaVision 3D can set up an online connection to the BD-LIVE™ service (page 24).
- Ensure sufficient free memory space for the BD-LIVETM content by deleting older saved data on the BD-LIVETM currently used (page 25). If the internal memory of your MediaVision 3D is insufficient, you can also connect an external USB storage medium with ≥ 1GB free memory.

Select the die $\textbf{BD-LIVE^{TM}}$ function in the Disc Menu of the Blu-ray $\mathsf{Disc}^{\mathsf{TM}}.$

The player establishes an Internet connection to the content provider and displays a selection menu. These menus have individual layouts, depending on the provider, and can contain diverse information and functions, e.g. trailers, games, up-to-date information etc.

Select menu item.

Press OK to confirm.

It may be possible to select menu functions with the coloured $\textcircled{\begin{tabular}{c} \bullet \begin{tabular}{c} \bullet \begin$

The selected media are loaded (this can take several minutes depending on the speed of the Internet connection) and a prompt to play or start the function appears.

Do not remove a connected external USB stick while data is being transferred.

Stop 2x Quit BD-LIVE™.

Sound functions

The functions of button differ depending on whether you are using **MediaVision** as an audio system (page 11 to 13) or as a player (page 14)

Audio system

MediaVision has a range of pre-set surround sound effects. The entries for the equaliser shown on the device display may vary depending on the sound sources and effects.

Open sound mode (press several times).

♦ Select option.

✓ ◀ ► Select/activate options

Equaliser The sound reproduction can be individually set up **Personal** Set up bass and treble

- Bypass Sound is not adapted
- Dialogue The sound reproduction is optimised for dialogue Classic The sound reproduction is optimised for classical music

Pop The sound reproduction is optimised for pop music **Reset** Restore factory settings

As a player

Open listening mode (press several times)

 Sound mode

 1

✓ ► Select the number of loudspeakers that you'd like to hear.

Playing media files

You can use your MediaVision 3D to play digital media services that are saved on discs, USB storage media or on your home network.

Main Menu

Call up the Main Menu.

In the Main Menu you can select the desired operating mode Movie, Music, or Photo (page 17).

✓ ► ▲ ▼ Select desired operating mode.

Press OK to confirm.

A selection menu showing the various media sources appears.

Press **OK** to confirm.

If several storage media are available when selecting USB, a further selection menu will appear.

✓ ► Select required storage medium.

Confirm with **OK**.

Video files

(MEDIA)

Playing video files

P+ or P- browse forwards/backwards.

♦ ▶ ▲ ▼ Select the Movie option in the Main Menu.

OK Start play or change to folder.

Play Start / Continue.

Call up the Main Menu.

- Display detailed information.

INFO

- 💿 💿 Call up the Main Menu.
 - In the menu: One level back.
 - For controlling the play of media files see the chapter "Playback in general" (page 28).

Playing media files

DivX subtitles

Select the subtitles as described on page 29.

Prerequisites for video files

- The maximum picture resolution of the DivX file is less than or equal to 1920 x 1080 (W x H) pixels.
- File name and path together shorter than 180 characters.
- Valid file endings for videos are: ".avi", ".divx", ".mpg", ".mpg", ".mp4", ".mkv", ".asf", ".wmv", ".m4v" (without DRM).
- Playable subtitle formats: SubRip (*.srt/*.txt), SAMI (*.smi), SubStation Alpha (*.ssa/*.txt), MicroDVD (*.sub/*.txt), SubViewer 2.0 (*.sub/*.txt), TMPlayer (.txt), DVD subtitles (.txt).
- Playable video codecs: "DivX3.xx", "DivX4.xx", "DivX5.xx", "DivX6.xx" (only standard playback), "Xvid.xx", "H.264/MPEG-4 AVC", "MPEG2 TS", VC-1 SM (WMV3).
- Playable audio codecs: "Dolby Digital", "MP3", "DTS", "WMA", "AAC".
- Scanning frequency: MP3: 16 48 kHz, WMA: 32 48 kHz.
- Bit rates: MP3: 32 320 kbps, WMA: 20 320 kbps.
- If the video file and the subtitles have different file names, the subtitles might not be displayed when playing a DivX file.
- If the sound and image trace are not synchronous, either sound or a picture will be reproduced.
- HD Movie files contained on CDs or USB 1.x memory sticks might not be played without fault, as the bandwidth for the data transfer is too low. Use Blu-ray[™], DVD or USB 2.0 storage media instead.
- This device supports the H.264/MPEG-4 AVC Main, High Level 4.1 Profile. A warning note will be displayed for media belonging to a profile above this.
- This device does not support the MPEG4/DivX6.xx functions GMC*1 (Global Motion Compensation) or Qpel*2 (Quarter pixel).

USB Mode

- You can connect a USB storage medium directly to each of the USB sockets.
- The standard USB 1.1 and 2.0 is supported.
- The USB device must not be disconnected during a data transfer.
- The file systems FAT16, FAT32 and NTFS are supported.
- The maximum number of files and folders is ≤ 2000. The search can take longer than 1 minute.
- Devices requiring an additional software installation for connection to a computer are not supported.
- USB connection options other than those indicated above are not supported.

Playing media files

Music files

Playing music files

Call up the Main Menu.

Music selection

You can play music to accompany the slide show.

▲ ▼ ◀ ▶ Select Music Select option in the Info Menu

Press **OK** to confirm.

- ▲ Select medium and music album.
- Folders containing music are marked with the symbol gekennzeichnet.
- Select OK button.

Press OK to confirm.

if necessary, go to the Info Menu and start play in the $\ensuremath{\textbf{Music}}$ option with $\ensuremath{\textbf{OK}}.$

Prerequisites for photo files

- Max. pixel width: 4000 x 3000 pixels /24bit/pixel
- Max. pixel width: 3000 x 3000 pixels /32bit/pixel
- Max. file size 4 Mbyte
- The maximum number of files and folders is ≤ 2000. The search can take longer than 1 minute.
- File extensions: ".jpg", ".jpeg", ".png"
- Photo files that are compressed progressively or without loss cannot be displayed.

Playback from iPod

You can connect your Apple iPod to **MediaVision** allowing you to enjoy your music with the highest quality of reproduction. Your **MediaVision** has an integrated iPod dock. If **MediaVision** is switched on, the battery of the connected iPods will be charged. You can find a list showing which Apple models are compatible with **MediaVision** on page 45.

Connecting the iPod

Insert the dock adapter supplied with your iPod in the loading recess of the iPod dock. Then place your iPod in the dock.

- Use the corresponding Apple Dock Adapter of your Apple iPod/iPhone to avoid damaging your iPod plug.
- When inserting and handling the iPod in the dock, only apply gentle force so as not to damage any sensitive plug-in connections.

iPod playback

- MEDIA Call up the Main Menu. ✓ ► ▲ ▼ Select the Music option in the Main Menu. Press OK to confirm. A selection menu showing the various media sources appears. ▲ ▼ Select iPod. Press **OK** to confirm. Press **OK** to confirm. ▲ ▼ Select desired Album. Play Start / Continue. Pause Stop play. For controlling the play of media files see the chapter "Playback in general" (page 28). Press briefly: Select title up/down. ----► Press longer: Search up/down. -----Press briefly twice to return to the previous title. Stop End play. • Select type of repeat (page 28).
- Depending on the software version, your iPod might not be able to be operated via **MediaVision**. We recommend updating the software of your iPod to the latest version.
- The compatibility with your iPod can vary depending on the model. For Apple devices supported see page 45.
- Faults can occur depending on the iPod device.
- Do not disconnect your iPod from MediaVision until it is no longer being accessed.

FM Radio

Setting the radio stations

You can save up to 50 FM radio stations.

For a perfect radio reception, the unit must be connected to a suitable FM Radio antenna (page 7).

Automatic search

Call up the Main Menu.

▲ ▼ Select the FM Radio option in the Main Menu.
 Press OK to confirm.

 \bullet \bullet \checkmark Press the **yellow button** for a longer period

The automatic search starts. All radio stations previously selected are deleted and overwritten by new ones (max. 50 stations).

Manual search

Call up the Main Menu.

▲ ▼ Select the FM Radio option in the Main Menu.
 Press OK to confirm.

Press long: • • Start search backwards/forwards.

Press briefly: • • Set frequency incrementally.

Press OK to confirm.

The numerical display of the next free station memory flashes briefly on the unit display.

▲ ▼ If necessary, set desired station memory.

Press OK to confirm.

The current radio station is accepted in the selected station memory.

Listening to the radio

Select saved radio station

or

Press and hold for FM Radio Mode

Call up the Main Menu.

▲ ▼ Select the FM Radio option in the Main Menu.
 Press OK to confirm.

📼 FM Ra	Idio
	02 Stationname 96.85 MHz

R

P+ / P- Radio station up/down.

Set radio station manually

å

Press briefly repeatedly: Set frequency incrementally.

♦ Press longer: Search run.

■ ■ **Red button** Screen OFF/ON (from chassis L271x, software \ge V9.2 - a software update might be necessary for the TV set).

💌 📼 🐢 Blue button: Mono/Stereo

SRC sensor surface: select the source on the device (without switching off the TV set).

Importing Music

Importing Audio CDs

You can convert the titles (tracks) on your audio CDs to digital music files and then access them easily with **MediaVision**. The music files are saved on a connected USB memory stick.

Connect a USB memory stick with enough free memory space to **MediaVision** (page 7).

Insert the audio CD in the drive (page 27). Start playing the disc (page 28).

INFO

▲ ▼ Select CD Recording option.

Press **OK** to confirm.

Show menu.

Highlight selected tracks with **OK**.

- ▶ Select the right menu.
- ▲ If necessary, select the bit rate in the **Options** Menu.

Start Selected tracks are converted

Select All Al tracks of the CD are selected

Option You can set the bit rate and hence the sound quality Close Cancel

▲ ▼ Select Start.

Press OK to confirm.

▲ ✓ Select a storage medium and a potential **destination folder** on this or create a new folder with **New Folder**. You can name the new folder using the keypad that is shown.

▶ Select the right menu.

Press **OK** to confirm.

CD Rec	ording			
0 Items			2/10

■ , 5	8 Folder			Close
		∢_r Move	🕵 Selec	Back

The conversion of the selected tracks now starts. The process lasts several minutes. The progress is displayed during this time.

A message is displayed after the process is completed. Press **OK** to confirm.

The finished music files are located in a new folder on the USB memory stick, which has the name of the CD album.

- Do not disconnect the USB memory stick from MediaVision until it is no longer being accessed.
- The music titles must be minimum 20 seconds long.

Further functions

Environment

Sleep Timer

You can use the Sleep Timer to set the unit so that it automatically switches off after a time set by you.

Press button.

The following appears on the display: SLEEP 180.

The time is reduced in specified increments until the automatic switch-off each time you press the **SLEEP** button again.

To reactivate the Sleep Timer, press the button until the normal display appears.

Source selection

You can also use **MediaVision** to play visual and audio sources from connected devices (page 7) and network media (DLNA).

MEDIA

Press the **PIP** button or sensor button **SRC** on the unit.

Call up the Main Menu.

Press **OK** to confirm.

Cardboard box and packaging

In line with national regulations regarding the disposal of packaging materials, we pay a fee to authorised recyclers who collect packaging from dealers. Nevertheless, we recommend that you keep the original cardboard box and the rest of the packaging materials so that the unit can, if necessary, be transported in the safest possible conditions.

The unit

Attention: The EU Directive 2002/96/EC governs the proper return, handling and recycling of used electronic appliances. Old electronic appliances must therefore be disposed of separately. Never dispose of this unit in normal domestic waste! You can hand in your old unit free of charge at identified collection points or to your dealer if you buy a similar new unit.

Other details about return (also for non-EU countries) are available from your local authorities.

Remote control batteries

The batteries provided contain no harmful materials such as cadmium, lead or mercury.

Regulations concerning used batteries mean that batteries may no longer be disposed of in household waste. You can dispose of used batteries free of charge at the collection points in commercial outlets. Your dealer will also have a collection point for used batteries.

Troubleshooting

Problem	Possible cause	Remedy
Not working at all.	Mains cable not plugged in.	Plug the mains cable into a socket 220-240 V 50/60 Hz.
No picture	The device is not connected correctly.	Make the connections as described on page 11 and page 14.
	The TV set is not set for the reception of video signals.	Select the correct AV programme slot on the TV set.
	The video cable is not connected correctly.	Check the two plugs of the cable for firm fitting in the sockets.
No sound.	Faulty connections of input or output cables.	Connect the cables properly (page 11 and page 14). If the problem persists, it is possible that the cables are faulty.
	The volume is set at minimum.	Turn up the volume.
	The sound is set to mute.	Press or V+ on the remote control to reactivate the audio output and then set the volume level.
Playback not possible.	No disc inserted.	Insert a disc.
	A disc that cannot be played has been inserted.	Insert a playable disc. (Check the disc type, the colour system and the regional code).
	The disc is dirty.	Clean the disc.
	The disc is not inserted with the playback side facing downwards.	Insert the disc with the playback side facing downwards.
	The disc has not been placed in the guide.	Place the disc correctly inside the guide in the disc compart- ment.
A displayed media file cannot be played.	The file format is not supported.	Convert the file to a supported format on a computer with a converter program.
The BD-LIVE™ function is not working properly.	The internal memory is not sufficient.	Delete the internal memory (page 25) or con- nect an external USB stick (>1 GB).
	The Internet connection is not working properly.	Set up the Internet connection as described from page 23 and make sure that you have a broadband connection.
	BD-LIVE [™] is deactivated.	Activate the BD-LIVE™ function (page 24).
The unit is not working properly.		Unplug the mains plug from the mains socket and then try plugging it in again after 30 seconds.
	The software of your Loewe TV set is not compatible with MediaVision 3D.	Please contact your dealer.
The remote control is not working properly.	The batteries in the remote control are dead.	Replace the batteries with new ones.

Glossary

24p Cinema Movie viewing: Today's Movie makers shoot their Movies with 24 images per second (24p); conventional televisions (and also most DVDs) show 50 images per second (50 Hz). In order to play the Movie, the original number of images is doubled and the Movie accelerated. That is optimum for sports broadcasts, but it distorts the picture quality for calmer movies. The new Loewe TV sets automatically reproduce 24p Movies in the original 24p format.

В

Blu-ray Disc[™]: (BD) Disc format for recording/playing high-resolution video material (HD) for HDTV devices and for saving large volumes of data.

BD-LIVE™: Extra service offered by some Blu-ray Disc[™] providers. Current trailers, additional information as well as interactive media and applications (e.g. games) can be loaded via a broadband Internet connection with this.

BD-J: The BD-ROM format supports the programming language Java for interactive functions. "BD-J" gives content providers a greater variety of functions when creating interactive BD-ROM titles.

BD-ROM: BD-ROM discs allows up to 25 GB (single layer) or 50 GB (dual layer) of data to be saved in a single disc.

С

CEC: Abbreviation for Consumer Electronics Control. CEC makes overall component control functions available for consumer electronics devices (e.g. System Standby, One Touch Play). CEC is referred to Loewe as Digital Link HD.

COMPONENT OUT: Connection via which the video signal is transmitted using three separate cinch connections. It is made up of the brightness signal "Y" and the colour difference signals "Pb" and "Pr". YPbPr is the original analogue version of digital YCbCr, which colour codes the video data saved on the DVD or transmitted with DVB per Sat, cable or antenna.

D

Digital Link HD: System for controlling units via the HDMI connection of the Loewe TV set when they have been set up in a covered position.

Dolby Digital: Digital multi-channel sound.

Dolby Pro Logic: Analog multi-channel sound.

DHCP: Abbreviation for Dynamic Host Configuration Protocol. DHCP allows automatic assignment of IP addresses with the aid of a DHCP server.

DHCP server: Network service which takes care of automatic assignment of IP addresses to clients.

DRM: Digital Rights Management. Processes to control copyright protected data. To be used correctly, DRM protected contents require not only a DRM capable device but also the possession of a license issued by the provider (to be paid for).

DTS: Digital multi-channel sound.

DVD: Abbreviation for Digital Video Disc and later Digital Versatile Disc.

Н

HDMI: High Definition Multimedia Interface, represents a newly developed interface for the fully digital transfer of audio and video files.

HDTV (HD): High Definition Television is a collective term, designating a series of high-resolution television standards.

L.

Interlaced Mode: Technology for image formation in interlaced scanning for flicker-free reproduction of frames with double frame rate.

IP-Address: IP addresses (Internet Protocol Addresses) are used to identify devices in an Internet Protocol (IP) network. IP addresses are made up of four groups of numbers of three digits each.

I.

JPEG/JPG: Joint Photographic Experts Group is a committee, which has developed a standardised method for the compression of digital images. This JPEG method (in short JPG), named after the committee, is an international graphics format for photos.

L

LAN: Abbreviation for Local Area Network. Mainly used as a name for networks with cabling (Ethernet).

Μ

MPEG: Digital compression method for video.

MP3: Data format for compressed audio files.

Ρ

PCM: Pulse Code Modulation for digital sound.

Progressive Mode: Technology for image formation with real full frames for flicker-free reproduction.

R

RGB: Colour signals Red, Green and Blue.

U

USB: Universal Serial Bus. Serial bus system for connecting external devices (USB card reader, USB stick).

w

WMA: Abbreviation for Windows Media Audio, Microsoft own audio data format. As with MP3 files, the content is compressed here as well.

Y

YCbCr: digital colour model, see COMPONENT OUT.

The cole number 2009 cares the pass YPbPr: analog colour model, see COMPONENT OUT.

Made for liPod iPhone

"Made for iPod" and "Made for iPhone" mean that an electronic accessory has been designed to connect specifically to iPod or iPhone, respectively, and has been certified by the developer to meet Apple performance standards.

Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards. Please note that the use of this accessory with iPod or iPhone may affect wireless performance.

iPod and iPhone is a registered trademark of Apple Inc. in the USA and other countries.

Gracenote® End User License Agreement

This application or device contains software of Gracenote, Inc., with head office in Emeryville, California, USA (hereinafter referred to as "Gracenote").

The software provided by Gracenote ("Gracenote software") enables this application to identify music albums and/or files online and access music-related data from online servers or integral databases (summarised under the designation "Gracenote servers"), including information on the name, artist, track and title ("Gracenote data"), as well as execute further functions. You may only use the Gracenote data as intended for the end user functions of the application or device.

You hereby assure that you shall only utilise Gracenote data, the Gracenote software and the Gracenote servers for your personal and non-commercial use. You assure that you shall not make the Gracenote software or any Gracenote data available to third parties, copy such for third parties or transfer or send such to third parties. YOU HEREBY ASSURE THAT YOU SHALL ONLY UTILISE GRACENOTE DATA, THE GRACENOTE SOFTWARE AND GRACENOTE SERVERS AS EXPRESSLY PERMITTED IN THIS DOCUMENT.

You hereby accept that your non-exclusive licence for the use of Gracenote data, the Gracenote software and the Gracenote server shall expire if you violate the above restrictions. You assure that you shall cease to use the Gracenote data, the Gracenote software and Gracenote servers in any way whatsoever after expiry of your licence. Gracenote reserves all rights to Gracenote data, the Gracenote software and the Gracenote servers, in particular all rights of ownership. On no account is Gracenote obliged to make payments to you for information which you make available to Gracenote. You accept that Gracenote, Inc., may enforce its rights resulting from this agreement directly and on its own behalf against you. Der Gracenote-Dienst nutzt einen speziellen Identifikationsmechanismus, um Abfragen zu statistischen Zwecken zu erfassen. Diese zufällig zugewiesene numerische Identifikation dient dazu, dem Gracenote-Dienst das Zählen von Abfragen zu ermöglichen, ohne dass dabei Daten über Sie bekannt werden. Weitere Informationen finden Sie auf der Webseite mit Gracenotes Datenschutzrichtlinie ("Privacy Policy") für den Gracenote-Dienst.

You shall receive a licence for the Gracenote software and all Gracenote data as issued. Gracenote does not make any explicit or implicit statements or promises in respect to the correctness of the Gracenote data on the Gracenote servers. Gracenote reserves the right to delete data from the Gracenote servers or change data categories for reasons that are reasonable in the opinion of Gracenote. Gracenote does not provide any assurance that the Gracenote software or the Gracenote servers will function without interruption. Gracenote is not obliged to provide you with new, improved or additional data types or categories which Gracenote might offer in the future, and Gracenote is entitled to stop its services at any time.

GRACENOTE EXCLUDES ALL EXPRESS OR IMPLICIT GUARANTÉES, IN PARTICULAR IMPLICIT GUARANTEES CONCERNING STANDARD QUALITY, SUITABILITY FOR A DEFINITE PURPOSE, OWNERSHIP AND THE NON-VIOLATION OF RIGHTS. GRA-CENOTE DOES NOT PROVIDE ANY GUARANTEE FOR THE RESULTS YOU ATTAIN THROUGH USING THE GRACENOTE SOFTWARE OR FROM GRACENOTE SERVERS. GRACENOTE IS ON NO ACCOUNT LIABLE FOR CONSEQUENTIAL OR ACCIDENTAL DAMAGE, FOR LOST PROFIT OR LOST REVENUE. © Gracenote. Inc. 2009
