## Hard Drive Installation Guide For Popcorn Hour C-200

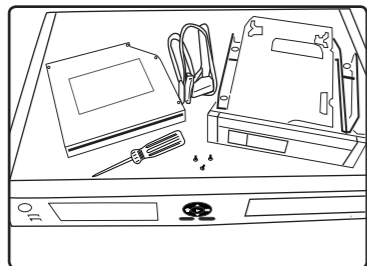

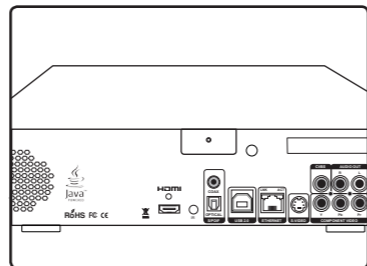

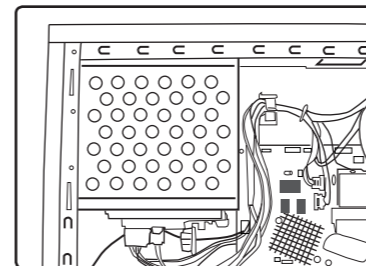

**Step 1**
What you need:
1) Popcorn Hour C-200.
2) HBR-200 HDD BD Combo Rack.
3) BDR-200 Slim BD Slot-in.
4) SATA & Power cable.
5) 3 screws.
6) Philip screw driver.

**Step 2**
Remove the screw as shown, and slide open the top cover of C-200.

**Step 3**
Removing the existing HDD rack.
1) Remove all 4 screws as shown.
2) Remove SATA and Power Cable, please take note of the cables as you will need it later.
3) Set aside the screws.

**Tip:** You may like to remove the cable clip for easy access of the screws.

**Step 4**
Removing existing HDD rack from cage and replacing it with HBR-200*
1) Remove all screws that secure the HDD rack.
2) Slide in the HBR-200 and replace all screws, make sure its tight.

**Note:** Please skip this step, if your Popcorn Hour C-200 comes pre-install with HBR-200.

**Step 5**
Connect the SATA and Power cable as shown to the BDR-200 prior sliding into the HBR-200.

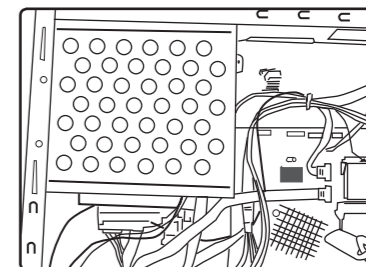

**Step 6**
Slide in the BDR-200 on top of HBR-200, make sure that the SATA and power cable are properly extended towards the end.
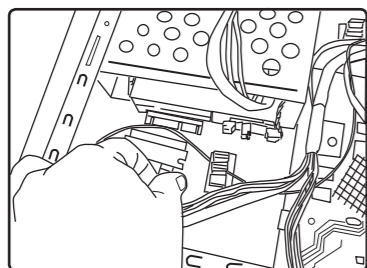

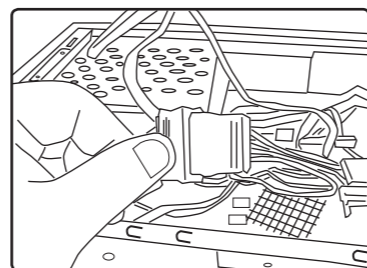

**Tip:** Slide in the cable first, it will be easier!

**Step 7**
Installing the BDR-200.
1) Ensure that the screw holes are align.
2) Using the supplied screws, please secure the BDR-200 to the combo rack.
3) Make sure the face plate is flash flat with the combo rack at the front.

**Step 8**
Reverse the whole process in step 3 to fasten your new combo rack to your Popcorn Hour C-200.

**Step 9**
Setting aside the BDR-200 SATA and power cable, please reconnect the HDD rack SATA and power cable to your HBR-200 as shown.

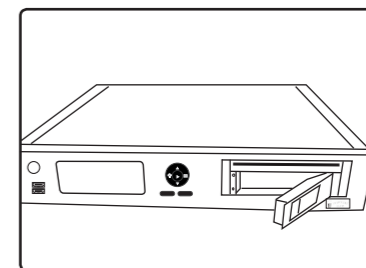

**Step 10**
Connecting power to the BDR-200.
1) The supplied power cable from BDR-200, it's a female connector.
2) Your Popcorn Hour C-200 comes factory pre-fitted with a extra male power cable.
3) Connect the both together, and make sure its secure as shown.

**Step 11**
Connecting the SATA cable from your BDR-200 to your Popcorn Hour C-200.
1) On your C-200 mainboard, locate the SATA connectors.
2) Remove SATA1 as shown (SATA2 connects to the HBR-200).
3) Replace it with the SATA cable from BDR-200.
4) Now it's good time to organize the cables in your C-200 by using the factory supplied clips.

**Tip:** You may like to cut the cable tight to remove the factory fitted SATA cable which is no longer needed.

**Step 12**
Now your Popcorn Hour is truly a Hybrid Networked and Blu-Ray media player!

Congratulations on your purchase !
