Press 1 on the remote control to agree and download the application.

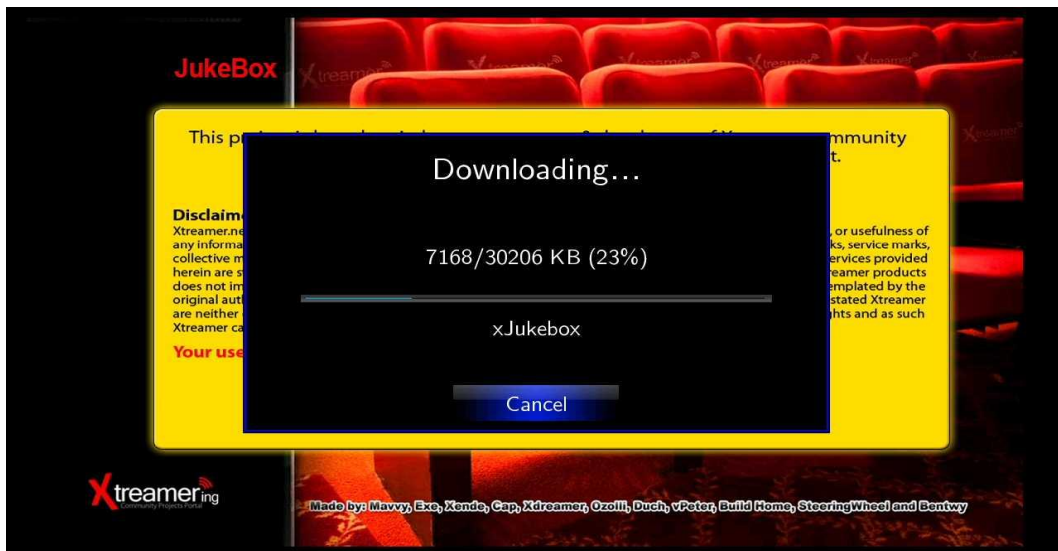

Major Function

Using Xtreamer

xJukeBox setup

Click OK to download or upgrade

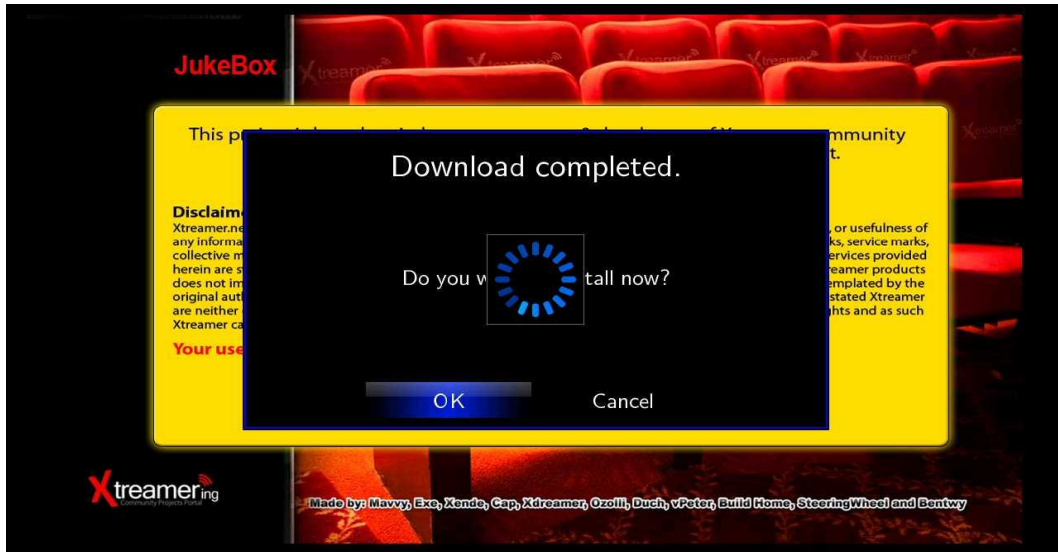

Please remember that if your download is taking too long you can always download the program from our forum or the Knowledge base and install it manually.

Major Function

Using Xtreamering

xJukeBox setup

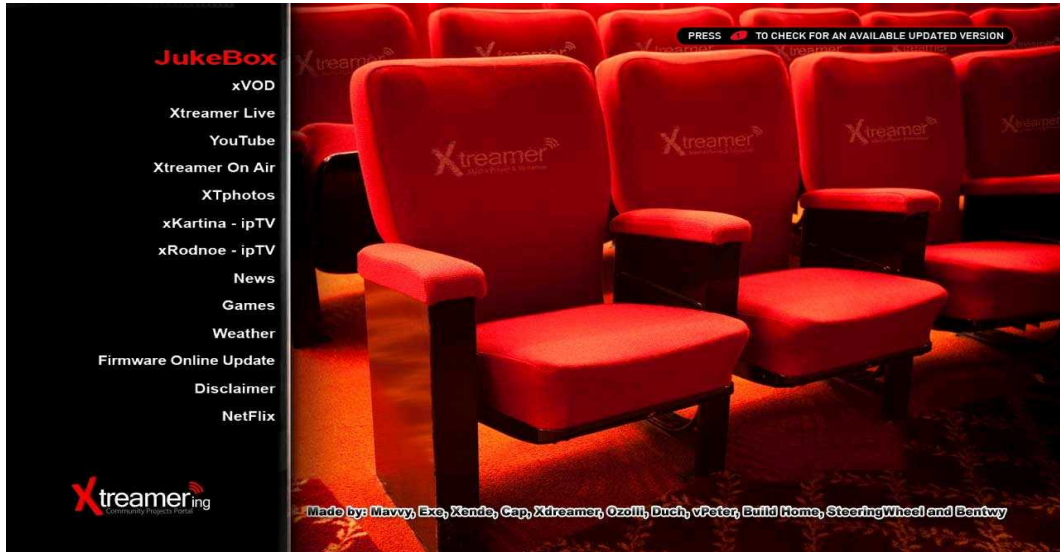

After the download is finished press OK to proceed with the installation.
It might take up to 10minutes.
After the installation you will be returned to the Main Menu.

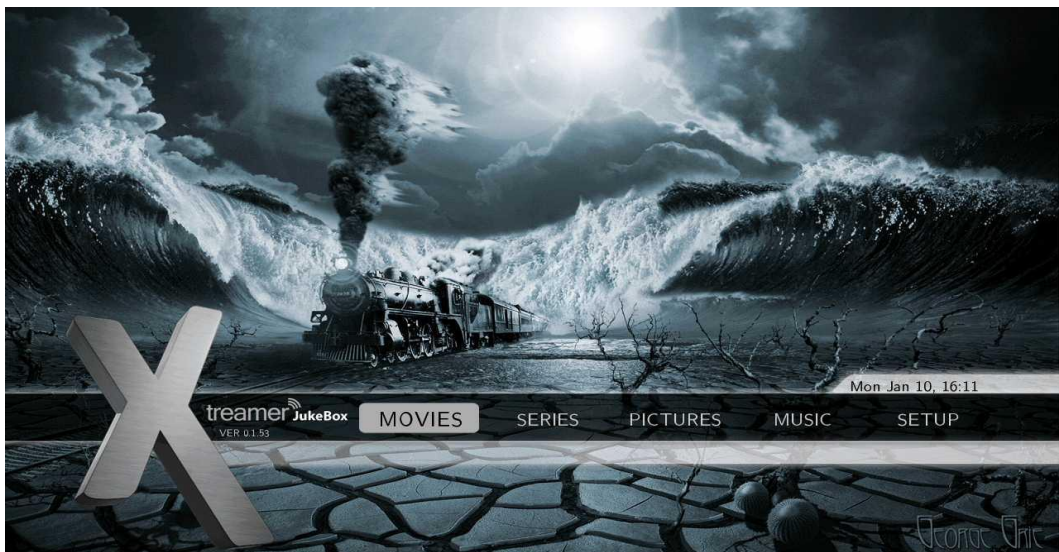

Before using the application please add some movie files to Favorites

Major Function

Using Xtreaming Setup xJukeBox

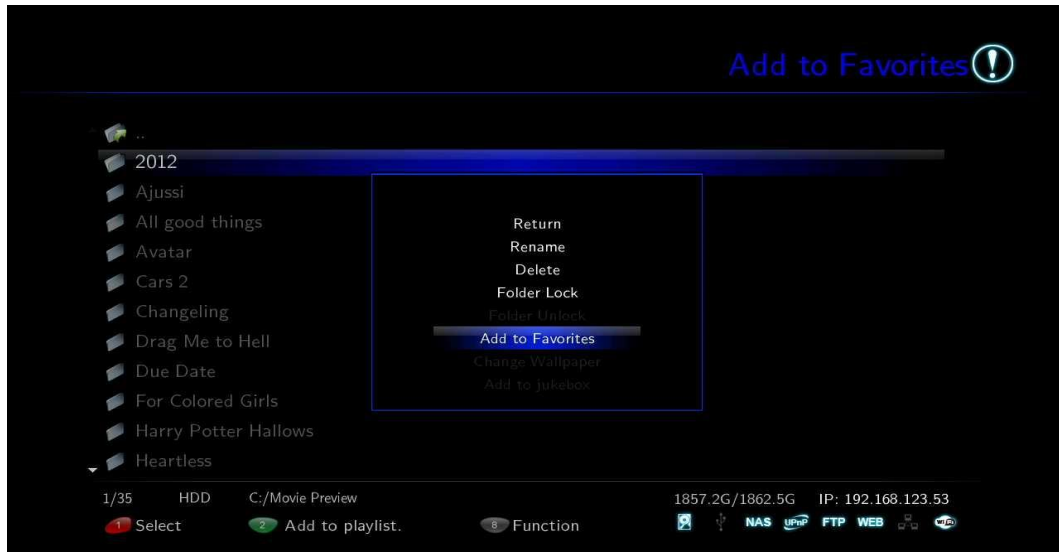

Navigate to Jukebox

Major Function

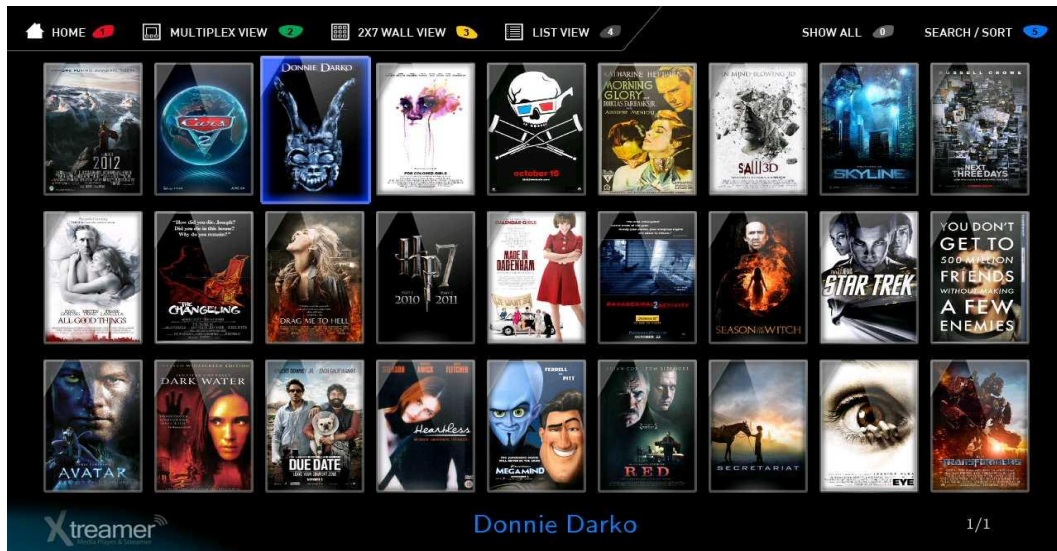

Using Xtreamer

Using xJukeBox

※ Note

Only the files and folders added to Favorites can be used with the JukeBox

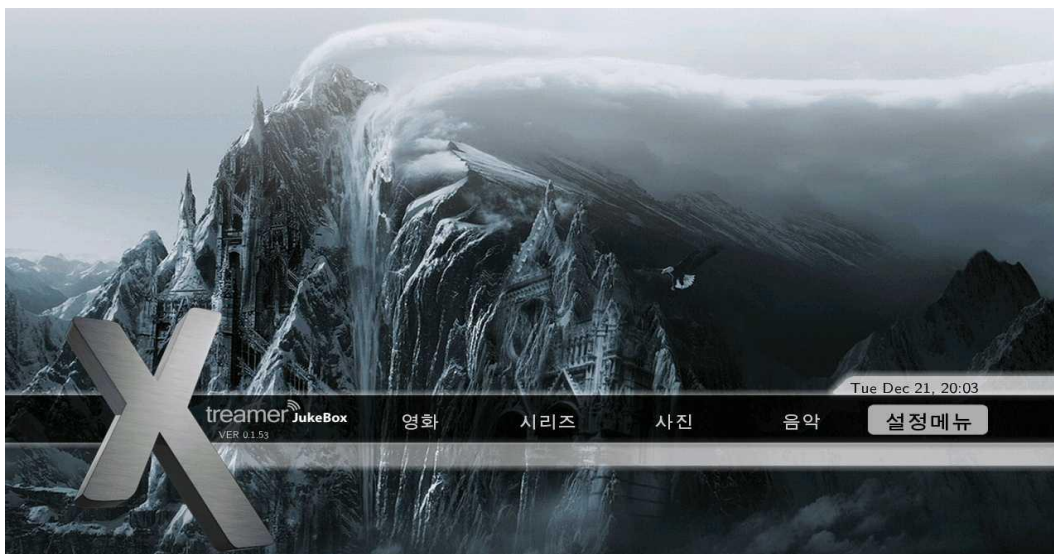

You can choose from several viewing modes: WALL VIEW, MULTIPLEX VIEW

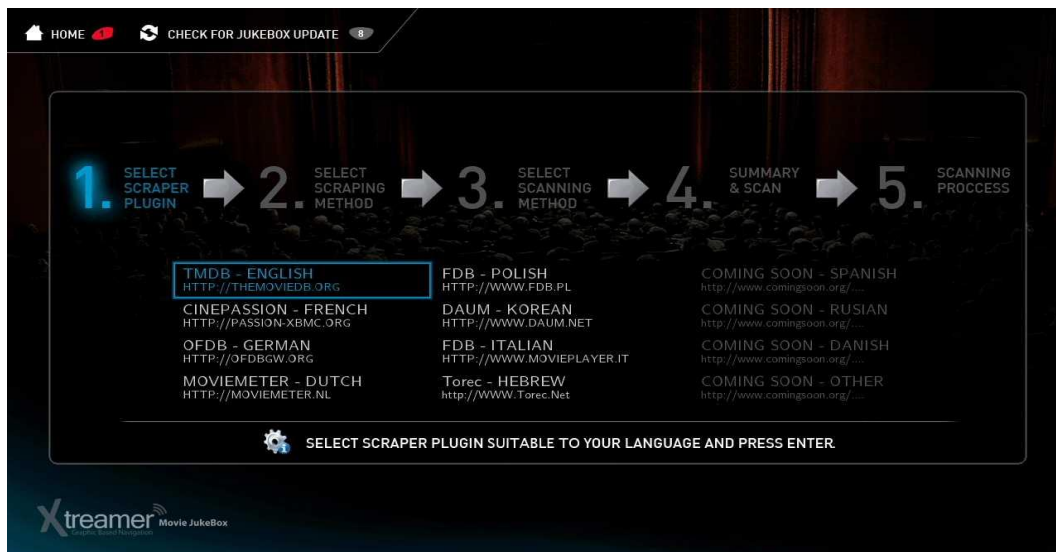

Major Function

Use Xtreaming menu

Using xJukeBox

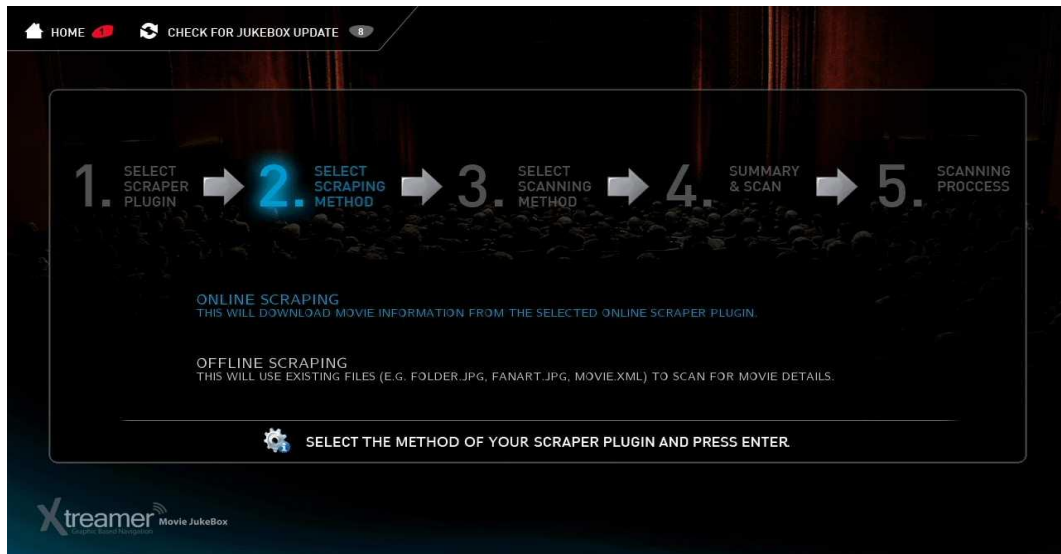

Navigate to Settings

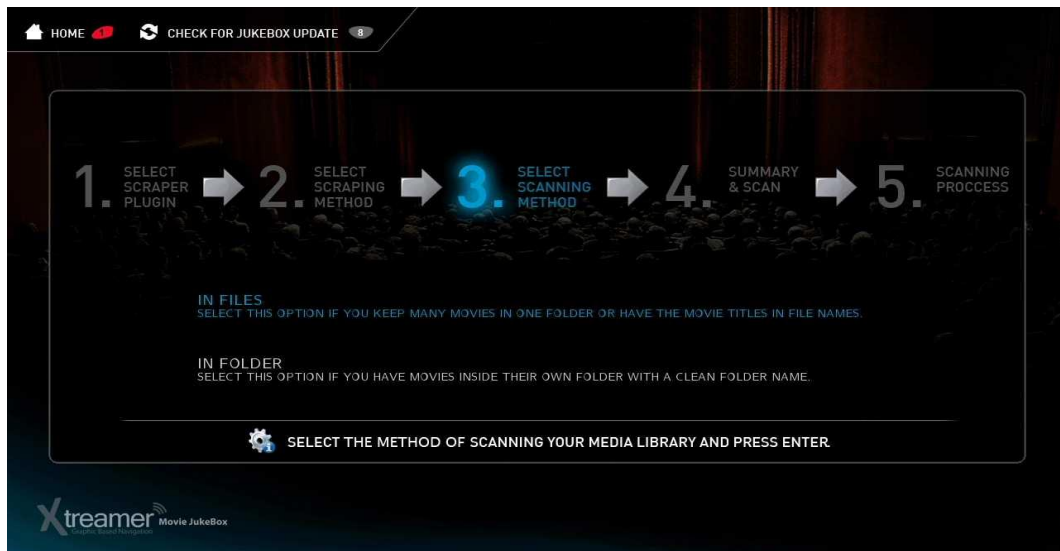

Select scraper plug-in suitable to your language and press enter.

Major Function

Using Xtreamer xJukeBox

Select the method of your scraper plug-in between online and offline, and then press enter. Choose Offline Scraping if you have Folder.jpg, panart.jpg, NFO and XML files available.

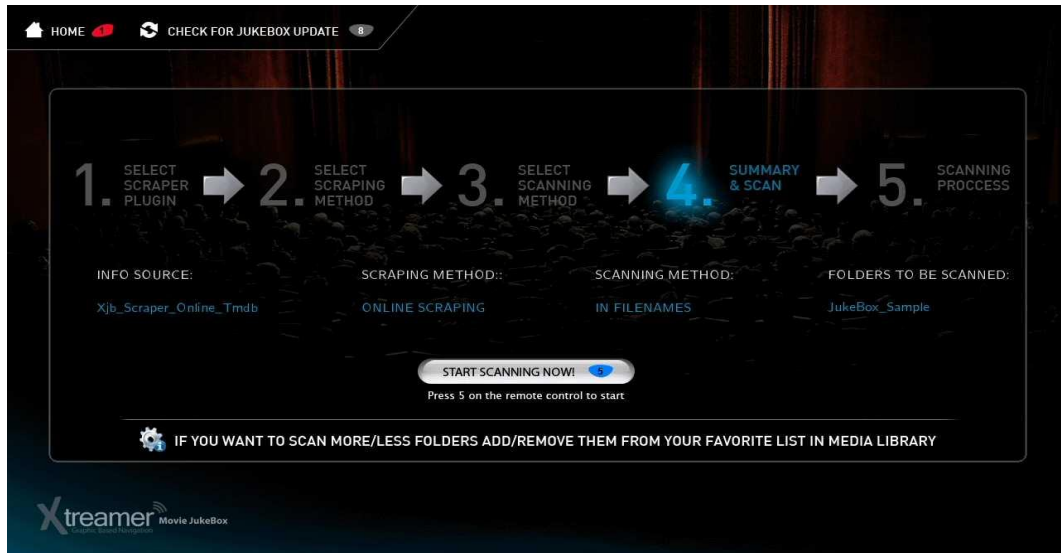

Select the method of scanning your media library and press enter.
Search "IN FILES" to search file name.
Search "IN FORLDER" to search folder name.

Major Function

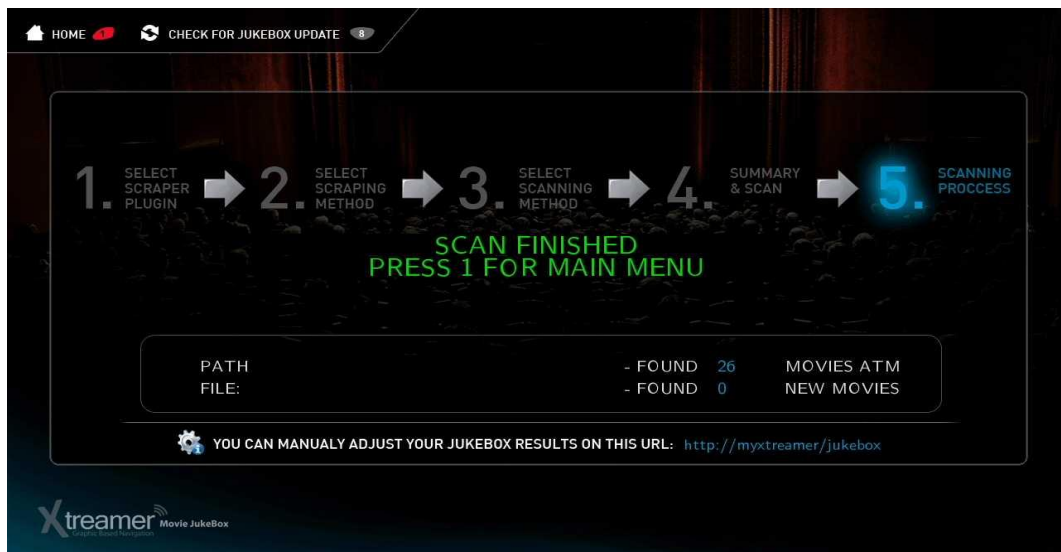

English

Use Xtreamer menu

xJukeBox use

Press button 5 on the remote control to start scanning the movie information via online. Scanning might take some time depending on the number of movies in your collection and network conditions.

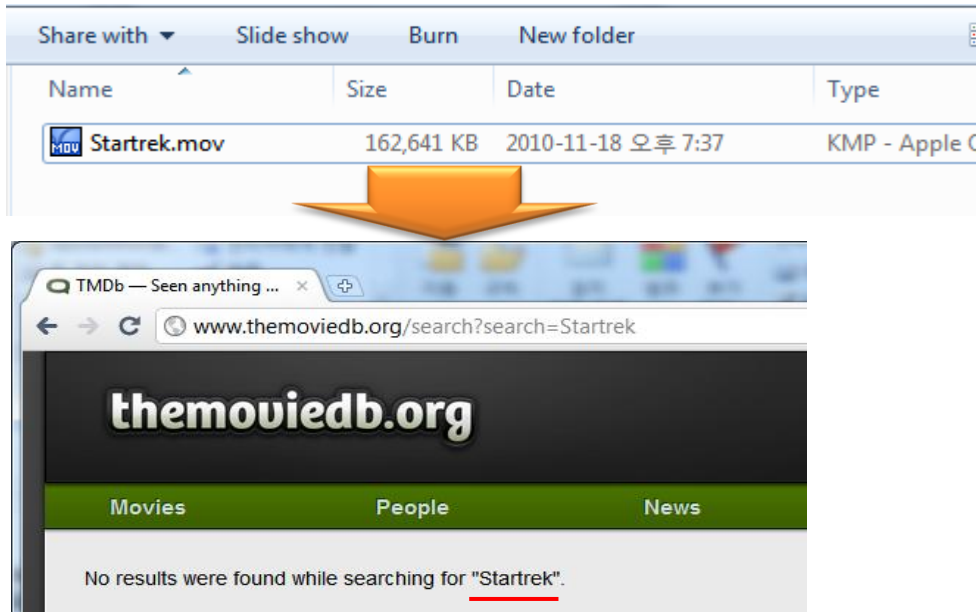

After scan finished, press [1] FUNC key on the remote control to return to the Main Menu.

Major Function

Using Xstreamer xJukeBox

How does the scanning work.

Please verify that the file name (Movie name) is correct.

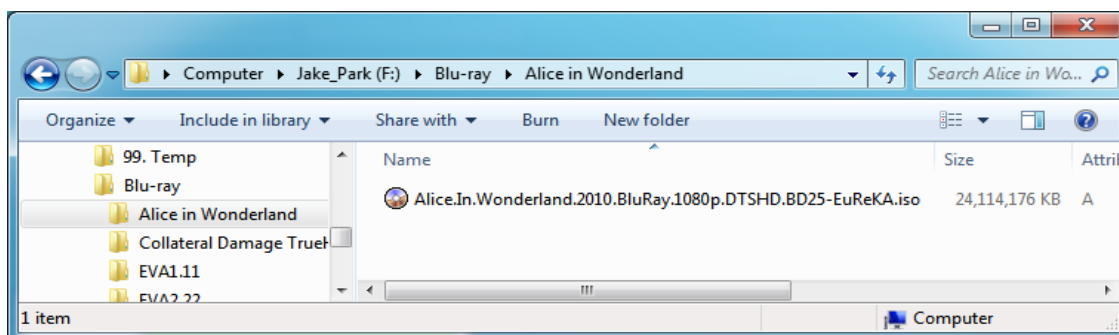

Once you found the right movie the Jukebox will access the information.

Major Function

Using Xstreamer xJukeBox

Please make sure to prepare for the scan and amend the file names to match the names of the movies in order to get better results.

The best way is to create a folder for each movie and change the folder name to match the movie on the scanner site and then search using the IN FOLDER scanning option,

Use the screenshot above as an example.

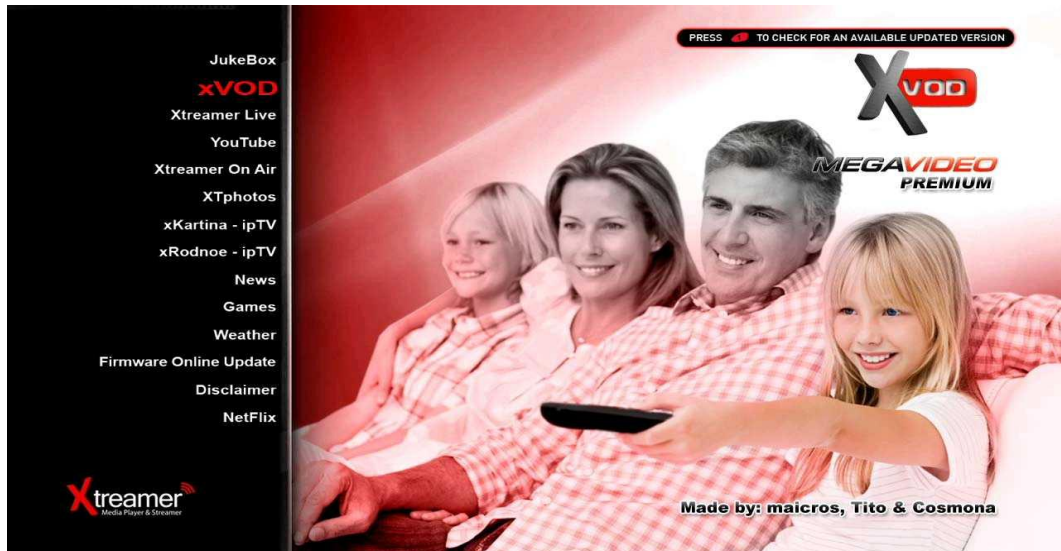

Major Function

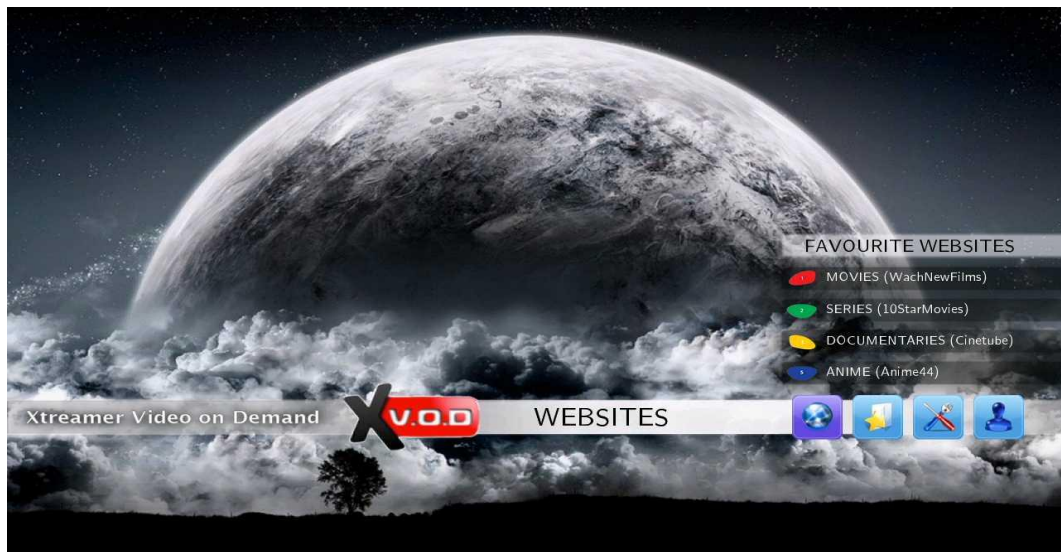

Using Xtreamer

Using xVOD

To use xVOD you need to have a premium account on Megavideo site.

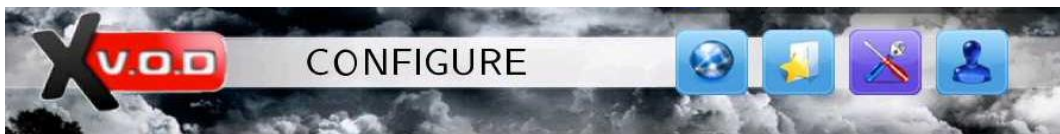

Basic setup process is same as with all the Xtreamer projects.
After the installation enter xVOD.

Major Function

Using Xtreamer

Using xVOD

WEBSITES : Select available sites.

BOOKMARKS : Your favorite videos

CONFIGURE : Enter your premium account settings.

ABOUT... : xVOD instructions.

First, go to CONFIGURE menu to enter MediaVideo premium account credentials.

Major Function

Using Xtreamer

Using xVOD

Choose Modify User name MU to enter your Megavideo user name

Insert your Megavideo password.

You credentials will be saved so you won't have to do that every time you access the service.

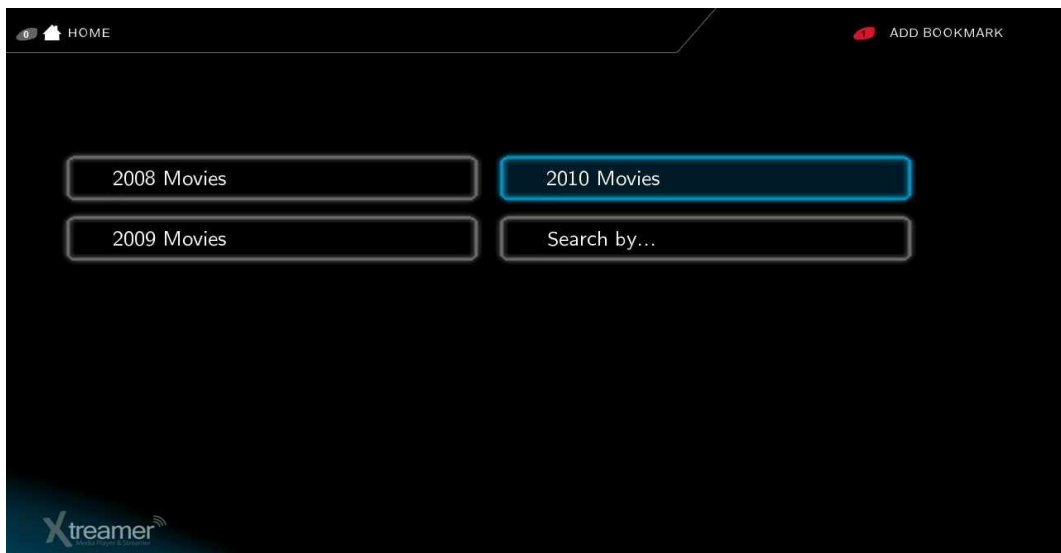

Major Function

Using Xtreamer Using xVOD

Following window appears when you access the Website menu.

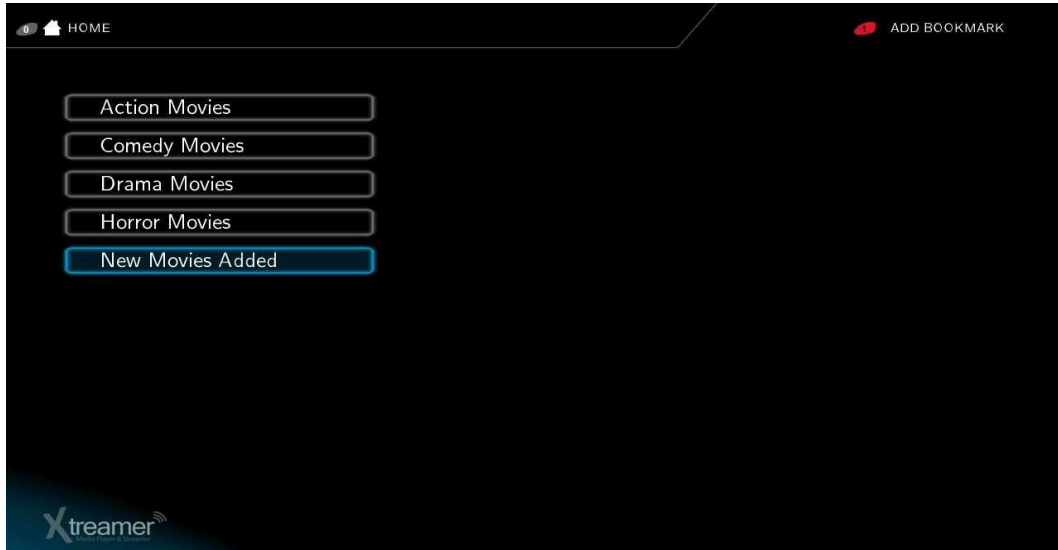

Choose WACHNEWFILMS (EN : English) to browse files

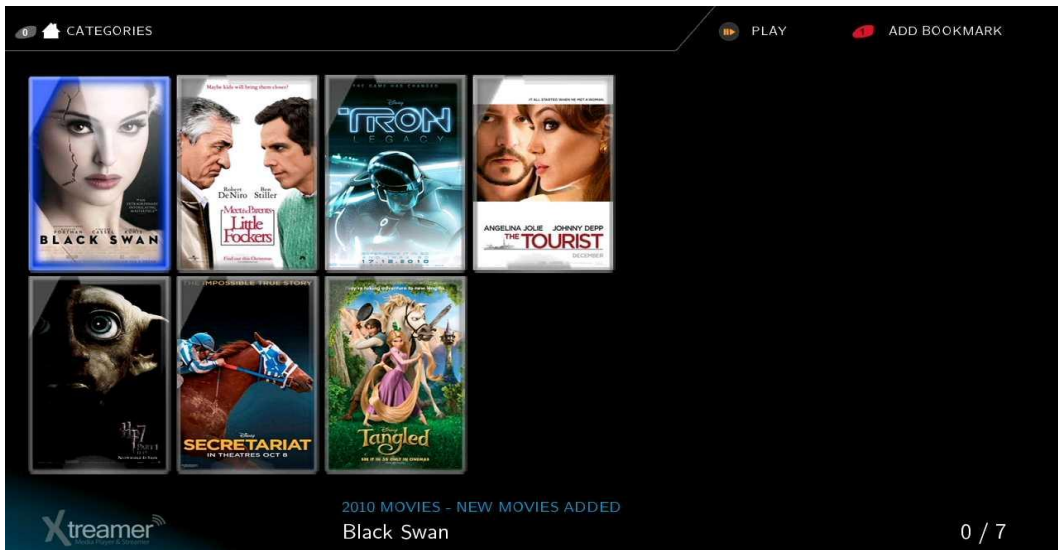

Choose a category.

Major Function

Using Xstreamer Using xVOD

Select a genre from the catalogue.

Now you can watch a movie without downloading it.

Press Enter to view the information about a movie.

► You can press the Play button for playback or press 1 to add to bookmarks.

Major Function

Using Xtreamer

Using xVOD

All the bookmarked movies are available in the BOOKMARKS menu

You can remove bookmarked movies by pressing button 2 on your remote control.

When using Movie Porter

If there are several files on the right side you can cycle through them to find a better performance.

※ Note

While playing over wireless network media streaming may experience lag, jitters or even disconnects. Such problems may occur due to insufficient bandwidth available via VOD service as well as network environment.

English

The screenshot displays the Xtreamer Video on Demand (VOD) interface. At the top, there is a navigation bar with buttons for HOME, MARK SITE AS FAVOURITE, and a list of categories: ALL, MOVIES, SERIES, DOCUMENTARIE, ANIME, and MIXED. Below this, a sidebar on the left features the MEGAVIDEO logo. The main content area is a grid of video sources, each represented by a star icon, a language code (EN, ES, DE, FR, HE), and a source name. The sources are: MEGAVIDEO.COM, 10STARMOVIES, ADNSTREAM.TV, ANIME44, ANIVIDE, CINETUBE, and WACHNEWMOVIES. Below the grid, a banner for Xtreamer Video on Demand is visible, featuring the X.V.O.D. logo and the text MEGAVIDEO.COM (--).
